AN EXPERIMENT THAT SUCCEEDED

Five years ago the people of Alberta, disgusted with the failure of Party Government to function to the advantage of the Province, defeated the candidates of the party machines, and experimented with a Government composed of men with no previous parliamentary experience, but actuated by a desire to serve the people's interests.

Five years have elapsed since that election. The Government formed then, goes back to the electors this month for their verdict.

The party machines are doing their utmost to defeat the only business and non-party Government the Province has ever had. U.F.A. candidates are responsible to their constituents, not to Ottawa. They have no blessings from Mackenzie King or Meighen, no patronage to distribute, no promise to make but that of continued good Government.

The members of the U.F.A. have subscribed funds and contracted for this space in "The Delia Times," and in the limited time and space available from now till election day will endeavor to broadcast the facts. Further facts will be given at U.F.A. meetings to be held in your district, at which your attendance is invited.

Contrast Provincial Conditions 1921 and 1925

1921 (Party Govt.)		1925 (U.F.A. Govt.)	
Budget Deficit	$ 2,118,209.00	Budget Surplus	$ 188,019 00
Capital Debt Incorporated	$16,704,934.00	Capital Debt Incorporated	$ 2,551,888.00
Employees (August 13, 1921)	2,697	Employees (February 1, 1926)	2,233
Public Health (1920)	$ 373.744.00	Public Health	$ 990,110.00
Telephones Operating	50,611	Telephones Operating	56,279
Telephone Earnings	$ 2,447,277.00	Telephone Earnings	$ 2,502,175.00
Telephone Operating Expenses	$ 1,431,671.00	Telephone Operating Expenses	$ 1,254,119.00
Printing Costs	$ 348,502.00	Printing Costs	$ 192,803.00

Issued by the U.F.A. Publicity Committee, Calgary.

Alberta Wheat Pool and Western Route

Preparations are being made by the Alberta Co operative Wheat Producers to handle a lot of the coming season's crop through the western ports, and already they report having secured a lease on the Government elevator at Prince Rupert, and it is understood negotiations are under way for additional storage and terminals at Vancouver. The lease becomes effective August 1, which assures time to get the first swing of the new crop. This move has met with the opposition of the grain trade and efforts have been made to nullify the arrangement.

The new coast elevator is said to be the fastest handling elevator on the Pacific, with a capacity of 1,250,000 bushels.

Pool officials state they expect to do an increasingly heavy grain business with the Orient through the Prince Rupert terminal, arrangements already being made with one of the largest steamship lines to call at Prince Rupert for grain loadings. Two ships may load at once at the elevator within seven hours.

—oo—

The head office of the Alberta Co-operative Poultry Producers, Ltd., has been moved from Calgary to the building occupied by the Provincial Egg and Poultry Marketing Service, Edmonton.

Departmental Examinations

Owing to the fact that rural schools will be required for polling places on June 28, the date of the Provincial elections, the dates of the Departmental Examinations have been altered as follows:—The examinations set for Saturday, the 26th, Tuesday, the 29th, and Wednesday, the 30th, remain as previously announced; those set for Monday, June 28, will be held on Friday, June 25, while those set for other dates will be held one day earlier, at the hour previously announced.

The 1926 convention of the Alberta Montana Highway Association will be held at Lethbridge in Aug.

Michichi Municipal District Council

A meeting of the above council was held at Mecheche on Tuesday, May 11, all the members being present.

A delegation from ratepayers in Verdant Valley, consisting of Messrs. Somers and Thos McKee, approached the council re the establishing of a road diversion on survey between Sections 4 and 9 in 29-19-4. It was pointed out that the road to the south of Section 4, and particularly the road to the west of said section, could not be made passable without the expenditure of too large a sum of money. Mr. McDaniel, who was present, disagreed with this view entirely.

Mr. Tabor reported for the committee appointed to investigate in regard to this diversion It was thought that the survey through Section 4 was the more practical as the original road would take considerable expenditure to make it passable.

Some of the councillors thought that for the very few ratepayers to be accommodated and the prospect of the marketing centres being changed when the new railway was constructed the established road east of Sections 4 and 9 could be used, although adding four miles or so to the round trip to Drumheller.

Councillor Reed moved that the committee's report be received but that action thereon be postponed.

Councillor McKee moved that G. J. Golds be paid $25 per acre in full of account re road diversion in S.W. 14-30-17.

Councillor Tabor moved that the Government road grant be expended as follows;—$90 on road from S.W. of 15-29-18 to S.W. 17-29-17; $59 between Secs. 23 and 24, and 25 and 26, 29-18; $279 25 from Sec. 7-29-19 to Sec. 7 29-18; $162. 50 from N W. 34-29-20 south and easterly to Provincial highway; $165 from N W. 34 30 20 to N.W' 34-29 20; $50 on south of Secs. 13 and 14-30 20; $125 from S W. 18-30-20 west to the river; $150 east of Secs. 1 and 12-30-20; $300 from S.W. 13-30-19 to S.W. 13-40-20; $250 from S.W. 5-30-17 north and westerly to N.W. 32 30-17; $30 from N.E. 2[illegible] S.W. 1 30-18.

Councillor Rodseth moved that each councillor be responsible for the expenditure of the appropriation for his Division and that he be allowed to pay the same rate of wages as in 1925.

As the new Municipal Act will not be effective until July 1 By-law No. 30 re new form of business assessment was repealed and the previous by-law was continued in force.

By-law No, 32, providing for a survey in N.E. 34-29-21, was passed.

The following weed inspectors were appointed:—Division 4, C. A. Clarke; Division 3, W. F. Lambert; Divisions 2 and 5, L. S. Schafer.

The rate of pay for weed inspecting was set at $4 per day and 10c. per mile travelled

Approval was granted Councillor McKee to sell Division 2's Western Illinois grader for $300.

The Divisions were granted appropriations on the basis of 2½ mills on the assessment of the separate Divisions, an equal share of the coal lease taxation, together with the surplus or deficit outstanding at the close of 1925, as follows:—Division 1, $1,891 61; Division 2, $1,008.58; Division 3, $1,446.44; Division 4, $2,419.80; Division 5, $2,579.64; Division 6, $2,003.94.

The approved accounts were ordered paid, and council adjourned.

G. A. Forster Again Candidate for Hand Hills

Gordon A. Forster, sitting member for the constituency of Hand Hills, was the choice of the delegates to the U.F.A. nominating convention held at Hanna on Saturday, and received a great ovation from the 70 accredited delegates and others present. Col. C. W. Robinson, Munson, acted as chairman.

After the preliminary business had been transacted, the nomination of candidates was proceeded with, five names being submitted, viz., G A Forster, Col. Robinson, J K Sutherland, George Proudfoot and S. R. Hooper.

J K Sutherland withdrew, and the others each addressed the convention. The balloting then proceeded, the preferential system being adopted. Three counts were necessary before the required majority was obtained. The final count resulted as follows:—G A Forster, 47; George Proudfoot, 24

Mr Forster was thereupon officially announced as the choice of the Hand Hills Constituency U.F.A. Association, and the chairman, H B Limpert, called upon the convention to express its unanimity, which brought forth loud and prolonged applause.

Mr. Forster, in a brief but concise speech, promised his supporters that he would, as in the past, apply himself diligently and faithfully to the service of the constituency, and expressed his appreciation of the confidence placed in him on this his second nomination as U.F.A. candidate in the constituency.

G.W.V.A. Sports at Delia a Big Success

The first annual sports of the Springwater Branch G.W.V.A. was held at Delia on Thursday last and proved a big success, between 600 and 700 people being present. A splendid programme of 28 events was down for decision, but owing to a paucity of entries several of these did not materialise.

In the Pony Race there were five starters, E. Evans winning easily by eight lengths, two lengths separating second and third. Five again turned out for the Free-for-All, and a ding-dong race resulted in Eddie Evans again winning he beating Russell Bradford by a neck in a good finish. In the baseball contest Hanna and Drumheller opposed each other, and in a mediocre exhibition the former won by 8—1, Drumheller being weakly represented. The children's events were well contested and proved very interesting.

A dance was held in the evening, close upon 150 couples being present. The day's gross proceeds amounted to $465, leaving a nice surplus for the benefit of the organization.

The officials were:—Horse racing: D H Campbell and J G Savage, judges; starter, A Fletcher. Athletic events: W B Dunlop, R A Stewart, Major Newman, and A Nichol, judges; D Mudie and J Lundal, starters Results:—

Half mile Race—1, W Blaney; 2, R Bradford.

High Jump—1, Dawson; 2, J Lees; 3, J Clarke.

Broad Jump—1, J Lees; 2, S Wylie; 3, Dawson.

Pole Vault—1, Johnstone; 2, Bryden; 3, Dawson.

Blindfold Wheelbarrow Race—1, L Hibbert; 2, W Blaney; 3, S Wylie.

100 Yards Dash, Men—1, Johnstone; 5. J Lees; 3, W Blaney.

Men's Obstacle Race—J Morrison.

Pulling Contest, over 3,000 lbs—A Fletcher.

Hitch and Harness Race—E Waldvogel.

Boys and Girls Pony Race—E Evans

Free-for All Horse Race—1, E Evans; 2, Russel Bradford

Tug-of-War—South of Railway Track

100 Yards, Girls—1, P Burke; 2, S Peterson; 3, Freda Lowe.

100 Yards, Boys—1; L Mason; 2, J Battle; 3, O Peterson.

Sack Race—1. M Poland, 2, C Blaney; 3, F Schatz.

Three legged Race—1. Schatz and Poland; 2. Robb and Morrison; 3, Miller and Blaney.

Relay Race—1, Schatz and Poland; 2, Robb and Morrison; 3, Mason and Morrison.

Egg and Spoon Race, Boys—1, J Morrison; 2, O Peterson; 3, J Battle.

Egg and Spoon Race, Girls—1. M Nelson; 2, C Meyer; 3, M Miller.

Quoiting Competition—1, J Fairbairn; 2, T Clapham; 3, W Reddy.

Eucharistic Congress Chicago, June, 1926

The Greatest Event in the History of the Catholic Church in America

C.N.Rys. TO OPERATE SPECIAL TRAINS FROM WESTERN CANADA

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill., June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways, who have arranged to operate special trains to and from the Congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask their people to make application promptly for the necessary sleeping car and hotel accommodation. The Church authorities were consulted prior to arranging the train service so that the proper departure time from the various centres would be ensured.

Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements. 20-23a

---

E. S. Hickey, Dominion land agent at Des Moines, Iowa, will arrive shortly with a number of prospective land settlers for Alberta from the Iowa capital.

On April 30, 1925, there was on deposit with the Alberta Government in savings certificates a total of 16,890,123. On April 30 of this year the total had reached $9,771,664.

Attract The Tourists

It is an economic truism that the imports and exports of a country must balance. That is to say, if a country imports more than it exports it must pay the difference in gold, which means that it sends money out of the country, that is, exports it. Thus is the balance maintained. On the other hand, if a country exports more than it imports then it has to be paid, which means an import of gold. Thus the country whose exports in raw materials, natural products, manufactured goods and general merchandise exceed imports of a like character, and to whom the importing countries must therefore remit gold in order to balance accounts, can hardly help but prosper and grow wealthy.

There are, however, what are termed invisible imports. For example, Great Britain is obliged to import food and other necessities of life on a huge scale, and it not infrequently happens that British exports of coal and manufactures do not equal these imports in value. Thus the balance of tangible trade is against Great Britain. But this is more than offset by the fact that the mercantile marine of Great Britain is the greatest trade carrying agency in the world and all countries pay tribute to Britain. The earnings of British shipping constitute a great but invisible import, and these imports, like exports, add to the national income and wealth.

There s another class of imports which operates in the same advantageous way, and one in regard to which Nature has equipped Canada to reap great benefits if the Canadian people make full use of their opportunities. We refer to tourist traffic. A tourist brings at least one thing with him—money. He spends it in travelling and hotel expenses, in means of recreation and pleasure, and in purchases in the country visited. Making Canada attractive from the standpoint of the tourist is, therefore, good national business. It will not only draw countless thousands of visitors from other countries, but it will encourage Canadians to spend their vacations in Canada, thus keeping their money at work for and in Canada, and in making them better acquainted with the Dominion and its enormous possibilities.

As already stated, Nature has done its part in richly endowing Canada with some of the finest scenery in the world and by making the Dominion a veritable sportsman's paradise. The Canadian climate, both in summer and winter, makes a strong appeal. But these things are not enough in this age. Tourists not only demand these things, and a marked change from the environment in which they live most of the year, but they insist on all modern comforts and conveniences, and go where they can be obtained.

Canada must, therefore, be made a country noted for its good roads if it is to capture any large share of the automobile tourist traffic which has now reached such large proportions. Canada must cater to the needs and tastes of all tourists by chains of good hotels, by bungalow camps, attractive summer and winter resorts.

Tourists will go where the greatest beauty beckons, the best roads lead and reasonable comfort and necessary conveniences can be enjoyed. A motoring tourist along a good road arriving at a town or village which presents a well kept and clean appearance, streets well treed, an attractive little park, and residential lots, both back and front, tidy and with trees, shrubbery, grassy spaces and flowers, and where the hotel, no matter how small, is spotlessly clean and good meals served, will almost certainly stay awhile. But if the town or village is the opposite of these things, it is even more of a certainty that the tourist will hurry right on.

It costs some money to make our prairie cities, towns and villages pleasant and attractive. But it takes more of time and patience than it does real money to transform them as many have been and are being transformed into places of real beauty and restfulness. It is the development of the right type of community public spirit that really counts in the achievement of results.

The securing of a fair share of the growing tourist traffic of the continent is something that no Canadian city, town or village can afford to neglect. It is cash business, and frequently leads to larger and unexpected business developments, because many a tourist while on pleasure bent is also keeping an eye open for investment and business opportunities.

And th making of the home town bright, clean and attractive is in itself paying dividends to all the townspeople in increased local pride and pleasure at home throughout the whole year.

Cannibalism Exists In French West Africa

Indulged In By Secret Society Of Witch Doctors

Cannibalism exists and is practiced to a considerable extent in several villages in French West Africa, bordering the Liberian frontier. This cannibalism is indulged in by witch doctors who form a small but active secret society. Recently two of them, one a woman, were arrested. The woman, in her confession revealed details of the manner in which two children had been murdered and eaten by the witch doctors. She explained that the rules of their secret society demanded that the victim should always be done to death by seven of the witch doctors, who otherwise would lose their magic powers. Members of the society were most particular always to sacrifice members of their own families as they believed that the flesh of strangers might be bewitched.

New Chicago Express

The first Chicago express of the season, establishing the new service between Jasper and Chicago over Canadian National lines, left Winnipeg on May 18 at 9.30 a.m., arriving at Chicago at 11.20 a.m. on May 19. This is the fastest existing service between these two cities.

Intimate friends are people who drop in for the evening every time you plan to go out.

Studying Industrial Conditions

Eight English Workingmen Sent To U. S. By London Paper

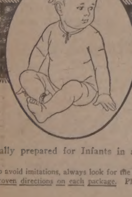

A unique delegation arrived in New York recently aboard the Carmania. They were eight British workingmen. One was a patternmaker, one a boilermaker, one a blacksmith, one a toolmaker, one a molder, one an ironworker, one a fitter, one a "machine man." They came to the United States for four weeks on invitation of the London Daily Mail, one of Lord Rothermore's papers. They are eight actual workers, not labor leaders, sent to examine working conditions, wages and industrial methods in the United States. The newspaper is paying all their travelling expenses, paying their wives (who remain at home) the men's usual wages, giving the men one hundred dollars each for extra clothes and fifteen dollars a week spending money, and providing each with a five thousand dollar life and accident insurance policy while on the trip.

Another Theory About Milk

Cow's milk as food has been condemned by the International Vegetarian Congress at London. Dr. Stavros Demoglou, of Greece, declared he had made experiments for two years. These showed anyone indulging in large quantities of cow's milk developed the brains and mentality of cows.

Some poultry food is made from the flesh of sharks.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher
Proven directions on each package. Physicians everywhere recommend it.

A Triumph In Surgery

Wonderful Gland Grafting Operation Reported From Lille, France

A gland grafting story of most dramatic character has been reported in Paris from the town of Lille. A nine-year-old girl, whose name, for obvious reasons, is reported merely as "Denise L.," had been an idiot all her life, due to certain glandular deficiencies. There was in the prison at Lille a convict who had been sentenced to the guillotine. Local surgeons decided to attempt a transplantation of the thyroid gland from the criminal's throat, under the skin of the unfortunate child and immediately after the execution this was done.

The surgeons then kept Denise under close observation for several months before they undertook to report the case. Their statement is that at the end of three months an improvement in the child's mental state began to be apparent, and that at the end of nine months, when the report was made, she had the understanding, behavior and vocabulary of a normal child of her years.

Pain In The Muscles, Stiffness In Joints,

Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where something is needed to dislodge a deep-seated, more or less chronic condition there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oily preparation, it has come to be known as King over all Pain. For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. A trial proves this. Get a 35 cent bottle from your dealer to-day.

High Altitude Affects Taste

Everest Climbers Found Onions and Peppermint Had No Flavor

A curious effect of high altitude was found, it is said, by the men who tried to reach the summit of Mount Everest. At a height of nineteen thousand feet the explorers lost their sense of taste, such food as onions lost its flavor, and peppermint had no pep left by which it might be known.

HOW WEAK GIRLS CAN GAIN STRENGTH

It Comes Through the Tonic Blood-Making Qualities of Dr. Williams' Pink Pills

In the life of almost every girl there comes a time when weakness attacks her. The strain upon her blood supply becomes too great, and there follows headaches and backaches, loss of appetite, attacks of dizziness, heart palpitation and constant weariness and a tendency to a decline. All these symptoms may not be present in any particular case, but the presence of any one of them shows the necessity for prompt treatment. And there is no other treatment so sure and so speedy as that through the blood-making qualities of Dr. Williams' Pink Pills. They are the one thing needed to maintain the health of growing girls and women of mature years.

Here is a bit of positive proof of the value of Dr. Williams' Pink Pills in cases of this kind. Miss Clara Fraser, Thessalon, Ont., has been brought back to health and strength through the timely use of this medicine, and gives expression of her gratitude as follows:—"I feel it a duty as well as a pleasure to tell you what Dr. Williams' Pink Pills have done for me. They have restored me to health, if, indeed, they did not save my life. I was suffering greatly from anaemia. I lost flesh and always felt tired and nervous. At last I grew so weak I had to remain in bed. The doctor did not seem to help me any and I was growing weaker, and my heart was bothering me. At last a friend who called to see me said she had read of a similar case restored by Dr. Williams' Pink Pills and urged me to try them. I felt helpless but decided to take her advice, so my mother got me a supply of the pills and I began taking them. It was not long before I began to find benefit from the use of the pills, and in less than two months my health was restored. In fact I was in better health than I had ever enjoyed before. I strongly recommend Dr. Williams' Pink Pills to all who are weak and run down, for I feel sure they will not be disappointed."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Boys' Hostel At Edmonton

The Church of England has opened a boys' hostel at Edmonton, the first of its kind in Alberta. The first lot of boys who will be cared for at this institution will arrive this month under the auspices of the church. A similar hostel has been operated in Montreal for some time and has met with considerable success, in placing boys on farms in the provinces of Quebec and Ontario.

Colonization Record

Southern Alberta has established something of a record in speedy colonization of one of its largest irrigation tracts. Between January and April of this year 200 new families were placed on the Lethbridge northern irrigation district, bringing the total number of families on that 100,000-acre project to 549.

Tin Added To B.C. Minerals

British Columbia's reputation as a mineral producing province received a decided impetus during 1925 when tin was added to the list of valuable minerals, production of which has brought the province to the forefront in the producing areas of the world.

The only innocent, harmless things to which man has a natural aversion are worms and spinach.

Is Learning the Business

Heir to Woolworth Millions Working In Long Island Store

Newspaper supplement editors will be glad to learn that Mr. Norman Woolworth, of the second generation in five and ten cent store business, is hard at work in the F. W. Woolworth store in Flushing, Long Island. Mr. Woolworth, whose income is said to reach $3,500 a day, is serving out his time under one of those queer wills which make it incumbent upon the heir to learn the business from the bottom up. He wears overalls in the cellar, where he is officially known as "head of stock."

When the six p.m. gong rings a large Lincoln draws up to the door of the five and ten, and the pumpkin develops six cylinders, with a liveried chauffeur in attendance. The heir to the Woolworth millions gives James the high sign and is driven down the road a bit to one of the show places of Flushing, where he lives.—The New Yorker.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Madame Lenin Disillusioned

Tired of Soviets Asks Permission to Settle in England

Madame Lenin, widow of the great Bolshevik leader, has had enough of the land of Soviets and has applied for permission to settle in England, according to a dispatch to the London Times. The Russian authorities are doing their utmost to restrain the lady, who is known there as Comrade Krupskaya, from carrying out her intentions. Not, to be sure, that they are so enormously fond of her, as she has been a merciless critic, but because they fear that she will devote her time in England to the writing of an expose of the Red movement that would be like a smashing thunderclap in the Bolshevist camp. It is plain, however, that Madame Lenin is disillusioned as much as Emma Goldman and Alexander Berkman. Her desire to break away from Russia at this time would again show the ironical conflict between the dreams of the ideologist and the hard facts of reality. If Madame Lenin succeeds in getting out of Russia, which is after all no easy matter, as Trotzky discovered, she will be able to give a true picture of Russia and none of the naive accounts that the world had from such credulous individuals as constituted most of the different missions that went to Russia for investigation, and who were shown only the polished surface and not the ugly inside of things.—New York Evening World.

Must Fly British Flag

Using Other Flags Alone Forbidden by Bermuda Law

Because so many houses in Bermuda were flying the United States flag alone, the Bermuda House of Assembly has passed an act forbidding the flying of any flag unless the British flag is also flown. The United States flag was being displayed to attract tourists it was ascertained, and not because the inmates of the house were Americans.

Attacked by Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Fingerprints Fail

Score one against the Bertillon system. Fingerprints of two prisoners in New York could not be classified by police because ridges of their fingers had been worn off during bricklaying operations.

LEG SORES

ARE CURABLE. If you suffer from Leg Sores or Varicose Ulcers, I will send you ABSOLUTELY FREE a copy of my famous book that tells how to be rid of these troubles for all time by using my remarkable painless treatment. It is different from anything you ever heard of, and the result of over 35 years specializing. Simply send your name and address to Dr. H. J. WHITTIER, Suite 29, 421 East 11th Street, Kansas City, Mo.

A Reciprocal Tariff

Canada Would Reduce Duty On Cattle If United States Takes First Step

Hon. W. R. Motherwell, minister of agriculture, announced in the House of Commons that the Canadian Government was prepared to adopt a "brick for a brick policy" with the United States in the reduction of duties on cattle. "Every step taken by the United States Government," he said, "in the way of a reduction in duty on Canadian cattle will be met by a corresponding reduction in the Canadian duty against American cattle. We have a brick for brick policy. That is to say every brick the Americans take off the tariff wall against us will be met with the removal of a corresponding brick from our tariff against American cattle."

Mr. Motherwell announced that the government this month had passed an order-in-council authorizing the minister of finance to take such action as may be necessary in the direction of reducing the Canadian tariff on cattle in the event of the United States making similar reductions.

Vodka Has Bad Effect

Is Blamed For Growth of Loafing In Soviet Factories

The re-introduction by the Russian Government of vodka of pre-war strength of 40 degrees is blamed by many in that land for the growing increase of loafing and abstention from work in Soviet factories.

The whole press, led by Economic Life and The Moscow Worker, is waging an against-loafing campaign. As worker corresponds from many factories point out, the decline began last fall, which seems to connect it definitely with vodka.

One writer from the Moscow steel works says: "Unnecessary absences from work increase 25 per cent. after pay days, the reason being drunkenness," which seems to dispose of the alternative reason advanced in some quarters that the growth of Soviet industry has brought in a number of unqualified workers from the country, lacking labor discipline, and causing accidents through unfamiliarity with their machines.

They Worked a Miracle for Him

So Says Ontario Man of Dodd's Kidney Pills

Mr. H. Austin suffered with backache, headache, and was gradually losing strength.

Coldwater, Ont.—(Special).—There is no more enthusiastic believer in Dodd's Kidney Pills anywhere than Mr. H. Austin, a well-known resident here. He has good reasons for his enthusiasm. He writes: "This is to praise Dodd's Kidney Pills for what they have done for me. I think it is a miracle. I suffered so much with my kidneys and pains in my legs and back. My head ached and, in fact, I seemed to lose my strength. After using six boxes of Dodd's Kidney Pills I am now quite well. Thanks to Dodd's Kidney Pills, which I always keep in the house now. I have gained in weight."

Many men suffer periodically with backache and, as middle age approaches, the pain increases in severity. Rest may give temporary relief, but Dodd's Kidney Pills do more than this. They strengthen weak kidneys and remove the cause of the pain.

An Interesting Discovery

Geologist Finds Skeleton In California of Archaeological Interest

Milton McMillan, geologist, saw a swarm of bees entering a small aperture in the wall of a canyon near Anaheim, Cal. He set off a dynamite charge expecting to uncover a honey cache.

Instead he blasted into a tomb containing a well preserved human skeleton and other objects of archaeological interest.

In a clay jug, hermetically sealed, were thousands of vegetable seeds. On many of the largest there were hieroglyphics, presumably carved by members of an early race.

The skeleton was farther back in the large cavern, seated upright on a niche in the rock. A footprint in the rock measured fifteen inches in length.

Report On Hebrideans

Of the twelve families—69 people—brought in from the Hebrides for settlement in Canada last year, one family—one adult and five children—has been deported because they became a public charge. In the House of Commons in answer to a question it was also stated that Father MacDonnell, who supervises the assisted immigration of the Hebrideans was paid $1,741 salary and $2,177 expenses.

Acreage in sugar beets in the irrigated districts of Southern Alberta will reach 7,000 acres this season. This is 1,000 acres more than the contracted area of last season.

Gentleman Visitor: "—but after my cold shower this morning, I felt as lively as a two-year-old pup."
Little Billy: "With fleas?"

In certain gulfs and bays the tide rises as high as 50 fee.t

It never reduces the size of a claim against an estate to file it.

Arms Parley In Deep Water

Faced With Question Of What Constitutes Armaments

The pour parlers in the preliminary disarmament commission have reached the realm of the wild and fantastic.

Holland held the centre of the stage in her listing of factors on which the power of a country in war time depends—factors which in Dutch opinion constitute armament.

For, like France, Holland believes armaments are the sum total of resources at the disposal of a state for conducting war.

In addition to such things as pigs, fogs and winds, the Holland experts deem armaments, positive or negative, the nature of the soil, and whether the soil be marshy, sandy, wooded, undulating, soft, hard, damp or dry. As for the subsoil they want to know whether quarries have good or bad influence on underground warfare and in addition to pigs, they place under agricultural war factors horses, cattle, sheep and goats.

It is now apparent that the disarmament discussion has got into deep water, and many persons in Geneva are inclined to think this is the inevitable result of turning over so many debatable problems to the military, naval and air experts.

Finds Riches In Old Organ

Bought For Trifle Contained Bank Books Showing Substantial Deposit

A pet kitten in Industry, Me., disappeared, says Capper's Weekly. In the family search that followed, Andrew Emery reached into the back of an organ he had bought for a trifle from a summer resident of Farmington. He didn't find the kitten, but he laid hold of a bundle of papers. Withdrawing the package, he found that it contained bank books showing deposits of more than $4,000 and about $1,000 in marketable stocks.

large Areas Being Planted

Larger areas than ever have been planted in tomatoes, potatoes and mixed vegetable crops in the district of British Columbia served by the new branch of the Canadian National Railways between Kamloops and Kelowna. These products from the interior valleys of the Pacific coast province are now finding their way into the leading markets on the American continent.

Applesauce seems to have been the source of all man's troubles.

New Klondyke In Siberia

Russians Forced to Sell Gold Dust and Nuggets to Soviets

Hungry gold seekers, twelve thousand of them, are feverishly working on a field which is described as a new Klondyke. It is situated on the banks of the River Aldan, in one of the most remote and wild regions in Northeastern Siberia, 300 miles from a railway. The Soviet estimates that there is one ton of gold to every 6,000 square miles comprising the new field. The Soviet has removed all Japanese and Koreans from the district, and has decreed that the field must be worked exclusively by Russians. The latter are forced to sell their gold dust and nuggets to the Soviet for £3 16s. per oz. Aeroplanes are conveying a limited supply of foodstuffs to the miners.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

England's New Princess Christened

Water Brought From River Jordan Used In Ceremony

In the private family chapel of Britain's Kings and Queens, located in the basement of Buckingham Palace, Princess Elizabeth, daughter of the Duke and Duchess of York, was christened. Water brought from the River Jordan was used in the baptism.

The sponsors for the royal baby were the King and Queen, the Prince of Wales, and Lady Elphinstone, a sister of the Duchess of York.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Eclectric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyer to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Destructive Dust Explosions

No less than forty-five were killed, twenty-eight injured and $3,000,000 property damage done by dust explosions in the United States in the last year. The explosions occurred chiefly among manufactories of wood and aluminum wares, starch, feed, cocoa, spices, sugar.

BAYER
Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds · Headache · Neuritis · Lumbago
Pain · Neuralgia · Toothache · Rheumatism

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.
Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Question Of Independence Of Canada Is Now The Subject Of Discussion

Ottawa, Ont.—Has Canada a status of independence today? If not, will Canada become independent? And is independence to be desired?

These questions were placed before Premier King and Mr. J. S. Ewart, "eminent constitutional authority," as reflections from the disagreement between Premier Hertzog, of South Africa, and Sir James Parr, high commissioner for New Zealand, caused by the former's recent speech before his house of assembly at Capetown.

Premier King reserved his opinion for pronouncement in the House of Commons at another time, but Mr. Ewart, as a student and recognized interpreter of constitutional questions, was able to discuss the subject in interesting details. In brief, he agrees with Premier Hertzog as to the desirability of an independent status but disagrees with him as to its present existence.

Premier Hertzog's expressed view was that the dominions have enjoyed independence established by the peace treaty of Versailles and that they now are retrogressing by surrendering this independence for an inferiority which threatens the unity of the empire. Sir James Parr criticized this view by declaring in London that there is no support for increased status and that New Zealand is content with present conditions.

Premier King, questioned in his dual role as prime minister and secretary of state for external affairs, said that the controversy is not one in which Canada should be officially involved.

"The fact that the premier of South Africa and the high commissioner of New Zealand have already disagreed," he explained, "is a good reason why I should express no opinion. It is not a wise subject for official controversy, and any statement I make regarding it must be made on the floor of the house."

Mr. Ewart's views on the three introductory questions put before him might be summarized as follows:

Canada has not a status of independence today; Canada is approaching independence every day, and will become independent by demanding such status; independence for Canada is desirable.

Protest From Livestock Board

Open Letter Is Sent To the Minister of Agriculture

Winnipeg.—The board of directors of the Winnipeg Livestock Exchange has sent an open letter to Hon. W. R. Motherwell, minister of agriculture, in opposition to what is termed in the letter "propaganda" published to the effect that the livestock exchanges regulations on the western markets "are opposed to the marketing of co-operative shipments of livestock and the pooling of livestock."

The letter states that the exchange had wired the minister asking if he had been correctly quoted in recent interviews and that the following reply had been received from Mr. Motherwell:

"Gave no formal interview re matter referred to, but did draw to attention of press men that co-operative marketing in west had now become so general and popular that at present stockyards regulations did not permit farmers pooling their livestock sales legitimately, then it might, and possibly would, be desirable to change such regulations."

The letter says the exchange "would be pleased to be advised by you just what regulations oppose the marketing of co-operative livestock or the pooling of livestock."

The letter points out that practically all exchanges in the west operate under the same regulations; that if there are any regulations prohibiting the practices named, that the exchange would asist in removing them "for good business reasons." In regard to the latter it is stated that such regulations would affect all the commission firms operating on the Winnipeg exchange.

Says China Resents Foreign Interference

Geneva Representative Becomes Excited At Meeting of Opium Commission

Geneva.—China is sick to death over foreign interference in her domestic affairs.

Mr. Chu, the Chinese minister to Italy made this declaration during a tempestuous session of the permanent opium commission in a violent altercation with the British delegate, Sir Malcolm Delevigne.

Sir Malcolm had criticized the importation of morphine into China.

He talked of the readiness of the Chinese to make war on Great Britain.

"If you can find a Chinese who is not anti-foreign and not anti-British, I'll say he is not a good Chinese," exclaimed the minister.

The word battle became so heated that M. Bourgeoise, president of the commission, was obliged to adjourn the session.

To Raise New Loan

Dominion Loan Not Exceeding $150,000,000 To Be Sought

Ottawa.—Authorization to raise a Dominion loan not exceeding $150,000,000 will soon be sought from parliament by Hon. J. A. Robb, minister of finance. The loan is for the purpose of paying, redeeming or otherwise retiring the whole or any part of loans or obligations of Canada and for public works and general purposes.

The Dominion Government has $35,000,000 in two-year notes maturing October 1, and $8,000,000 in two-year notes maturing November 15.

HAS CONFIDENCE THAT MERCHANT MARINE WILL PAY

Ottawa.—"I am very far from regrading the Canadian Government Merchant Marine as it is sometimes lightly and ridiculously called 'a white elephant,'" Sir Henry Thornton said in reply to a question before the railway committee of the house.

He was hopeful that with caution in its management, diligence, economy, and due regard to pushing its business the merchant marine would be able in future years to show a substantial profit on its operation, although it would not, at least for many years to come, be able to return interest on the amount of money the ships cost.

"For the first five months of this year," Sir Henry said, "the C.G.M.M. had an operating profit of $62,000. This is the first time of any protracted period that it has been able to show a substantial profit."

He added this was a pleasant indication not only for the government ships, but also showed an improvement in international trade which was beginning to get back into its stride.

"With regard to the Canada-British West Indies trade," said Sir Henry, "it does offer considerable promise. We will be in a favorable position by getting in early. The next ten years will be profitable to whoever goes into it and to Canada."

ALBERTA SCHOOL QUESTION GOES TO SUPREME COURT

Ottawa.—Hon. Ernest Lapointe, minister of justice, announced in the house that the department of justice had in hand reference of the Alberta school question to the Supreme Court of Canada.

"I believe," said Mr. Lapointe, "that this solution is fair to all parties and I earnestly hope that this delicate question will in this way be settled definitely and removed forever from the field of controversy."

Mr. Lapointe said the amendment made by the legislature of Alberta, "without our consent" to the natural resources bill suggested that the laws of the province might differ from, or be in conflict with Section 17 of the Alberta Act. Otherwise, the amendment would be useless and futile. The Alberta Act had stood as the constitution of the province for 21 years. "We cannot directly or indirectly, even in a tacit manner, acknowledge that its validity might be subject to question," added Mr. Lapointe. However, the Dominion Government was prepared to take immediate steps for a reference to the Supreme Court. "We will submit the act and support its validity and give an opportunity to those who question it to present their views," Mr. Lapointe said.

Methods Of Smugglers

Goods Are Rolled Across the International Boundary Line

Ottawa.—Smuggling methods along the international boundary at Rock Island and Beebe, Quebec, were described before the customs investigating committee. The two points both touch the international boundary. For half a mile or so the international boundary runs down the middle of the road which connects them.

A customs preventive officer who was sent down to Quebec told of small sheds termed warehouses, being established just on the Vermont side of the line. American goods would be consigned there and then just "rolled across the line" when convenient.

"They just throw them across?" questioned R. L. Calder, committee counsel.

"Yes," said the witness with a smile.

Cure For Leprosy

New Treatment Devised Meets With Great Success

Berlin.—A new treatment for leprosy has been devised by Prof. S. Paldrock, of the University of Dorpat, Esthonia, who in an article in the German Dermatological Journal, announces that after many years of experimentation, he had succeeded in killing the leprosy germ by means of freezing.

Carbolic acid "snow" was applied to diseased tissue with the results that of 16 patients treated, seven already have been discharged as wholly innocuous to society, the article said.

Labor Conditions In Orient

Geneva—Eighty-three thousand Japanese women work in the mines and 48,000 of them labor in the darkest depths, Japanese representatives told the International Labor Conference here.

This admission followed an assertion of Miss Margaret Bondfield, English labor worker, that working conditions in Japan, China and India were "intolerable."

Calgary Candidates

Calgary.—For the five members to be elected by proportional representation in the city of Calgary, Liberals decided to place three candidates in the field. On the first ballot they chose R. C. Marshall, sitting member of the legislature, Mrs. Nellie McClung, author and lecturer, member of the legislature last session for Edmonton, and Mayor George H. Webster.

Foot and Mouth Disease

London.—The foot and mouth disease of cattle is brought into England in the carcasses of pigs imported from the continent by British factories which cure the meat of the pigs. Rt. Hon. Walter Guiness, minister of agriculture and fisheries, made this statement in an address to the council of agriculture of Middlesex County at the Guildhall.

Is Not Joining Laborites

London.—Former premier Lloyd George, parliamentary Liberal leader, whose differences with Lord Oxford and Asquith have shaken the Liberal party, has written a public denial of the report that he sought to join the Laborites.

Three Life Savers On World Cruise

Photography ranks among the most popular of the many pastimes on board ships making cruises around the world. Under sunny skies and with perfect weather conditions, not many can resist the lure of the little black box which magically reproduces striking likenesses of places and people. Soon after breakfast an army of amateur photographers appear on the scene prepared to "shoot" anything in sight, providing the interest is good enough. Tourists feel that nothing brings back happy memories of pleasant travelling days so succinctly and sharply as pictures.

Above, from left to right are Miss Dorothy and Miss Marjory Hager, of Vancouver, B.C., snapped on the deck of the Canadian Pacific liner Empress of Scotland, while making the Round-the-World Cruise this year. The Misses Hager with the round disk form a trio of life savers.

No Action On Cattle Tariff

U. S. Legislation Not Possible Before Next Congress Meets

Washington.—Talk here in reference to the cattle tariff, growing out of Hon. W. R. Motherwell's statement to the House of Commons at Ottawa, is that there is no likelihood of any change in the present situation in the near future. It is pointed out no legislation is possible before the seventeenth congress, which will be elected next November, but will not meet in regular session for a year and a half.

So far as the flexible tariff is concerned officials of the tariff commission point out there is nothing formal before them on cattle rates. While there has been agitation by some livestock interests on this side to let down the bars as to feeder cattle other livestock interests are fighting the proposition. With a congressional campaign on and with the agricultural situation in the middle west, northwest and south unsatisfactory there is little or no prospect, it is felt here, for opening up the cattle tariff question.

New Polish President

Will Soon Step Aside In Favor of Pilsudski Say Politicians

Warsaw.—The hectic career of Professor Ignaz Moscicki—variously known as a rebel's son, a world famous inventor, and once a fugitive from his country—has reached a climax in his election to the presidency of Poland, in which office he will fill the role of Josef Pilsudski's puppet.

Warsaw received news of his election with a calm that was almost disinterest. Moscicki will be president for a day, say the politically wise of the capital—long enough to shoulder the blame for any mistakes of the transition period—then he will step aside when the constitution of Poland has been re-shaped to suit the dictator, and Pilsudski will take over the office along with the power which in reality will be his all along.

Attempt To Criticize King George Quashed

Laborites Told By Speaker It Would Not Be Allowed

London.—An address of thanks to King George for his proclamation continuing the state of emergency because of the coal strike was carried in the House of Commons, 249 to 100.

An attempt to criticize the King by some of the Laborites, notably the Clydesider, G. Buchanan, was quickly quashed. The speaker told the Laborites they could not bring the sovereign's name into the discussion because what he had done was done on the advice of his ministers.

SERIOUS SPLIT IN LIBERAL PARTY IN GREAT BRITAIN

London.—That the Liberal party of Great Britain has been completely rent asunder and that all political association between the Earl of Oxford and Asquith, leader of the party, and David Lloyd George, its parliamentary chairman, has been irrevocably ended is admitted by the Liberals themselves, no matter to which leader they are adhering.

Pending further developments following letters from the Earl of Oxford and his supporters, it is assumed that the Liberals in parliament will form into two groups and act independently of each other.

The National Liberal Federation, the main organization of the party, will meet the week after next. The question of party leadership is expected to dominate all other business. It is reported that the federation will be asked to vote confidence in the Earl of Oxford.

The Daily News says nothing now can save Liberalism but action by the rank and file of the party who themselves must achieve its salvation.

Wembley Will Be Sold At Auction

No Private Tenders Have Been Received By Liquidators

London.—Wembley is to be sold. The liquidators, after vainly endeavoring to get a bid for the great exhibition grounds and buildings by private tender, have decided to put the whole up at public auction. The site covers about 132 acres, and the sale will include the Palace of Engineering, the Palace of Industryy, as well as the Stadium, which will accommodate 100,000 people. Several of the Dominion pavilions will also be included in the sale.

Will Not Be Candidate

Edmonton. — Ex-premier Herbert Greenfield has announced that he will not be a candidate in the Alberta general election June 28. He expects to take an active part in the campaign, addressing meetings on behalf of the U.F.A. candidates.

May Be Exiled So Corsica

Paris.—The Petit Parisien quotes a Rabat (Morocco) newspaper as saying that Abdel-Krim, the surrendered Riffian chief, will probably be exiled to Corsica.

Britain Sends Warship To Alexandria To Protect British Interests In Egypt

War On One Big Union

Winnipeg Mayor Says Means Must Be Found to Dislodge Organization

Winnipeg.—Open war on the One Big Union with a view to its ultimate extermination, was declared by Mayor R. H. Webb, of Winnipeg, in addressing the annual meeting of the industrial development board here.

The organization, which is regarded as the left wing of the labor movement, has its headquarters in Winnipeg.

Mayor Webb declared some means must be found to dislodge the O.B.U., which, he charged, was "undermining progress and development in the city." He criticized the federal authorities for granting the street railwaymen's unit of the organization a board of conciliation in an effect to settle the present deadlock between the Winnipeg Electric Railway and the men. The traction company has refused to recognize the union or negotiate a new agreement with their employees who are affiliated with the O.B.U.

Many Injured In Gas Main Explosion

Weak Seam Given As Cause Of Accident In Los Angeles

Los Angeles, Calif.—Nine persons were injured, some seriously, when a sixteen-inch gas main exploded in the crowded east side of the city.

With a roar that could be heard a mile distant, the blast ripped a gaping hole in the pavement 100 feet long and 15 feet wide, and piled the remains of three buildings into a dusty, smouldering heap.

Six pleasure cars and three trucks, which were passing, were lifted high into the air and dropped, demolished and burning, into the great hole.

Damage in excess of $200,000 was estimated by police. It is believed, however, that losses will exceed that figure.

A weak seam in the big main was given as the cause of the blast.

Tidal Wave In Burma

Death Toll Has Reached a Total Of 2,800

Rangoon, Burma.—The death toll of the recent cyclone and tidal wave on the coast of Burma has reached a total of 2,800, according to a report submitted by the commissioner of the district of Arakan.

It is feared that the total number of deaths may reach almost 4,000 in the affected regions.

Huge property loss has been suffered through the area which was swept by the gigantic death-dealing gale. Residents fled hurriedly from their homes in a desperate but often vain effort to escape the pursuing death, and they left their personal effects behind.

Relief work is progressing as well as possible, but it is said to be totally inadequate to meet the present situation.

Canadian Envoy To U. S.

Appointment Is To Be Made Says Senator Dandurand

Ottawa.—Senator Dandurand, government leader, replying to a question in the senate, said the government intended to appoint a minister plenipotentiary to Washington. As to when the appointment would be made, this was under consideration.

Senator Dandurand said there had been no correspondence between the Canadian and the United States Governments in refernce to the appointment of an American ambassador to Ottawa.

Arrest U. S. Diplomat

Honolulu.—A special dispatch from Tokio to Hochi Sha, Japanese newspaper here, says that O. K. White, a member of the United States embassy staff in the Japanese capital, was arrested while taking photographs in the Sasebo naval base.

London.—With a ministerial crisis pending in Egypt and having in mind the acquittal of the alleged assassins of Sir Lee Stack, British Sirdar of the Egyptian army in 1924, Great Britain has informed the Egyptian Government that it reserves "complete liberty of action."

The British Government is backing up this notification with the dispatch to Alexandria of a warship from Malta, denominating this, however, as merely a precautionary measure for the protection of British and foreign interests.

The most important question at issue is the Egyptian premiership, which recent reports asserted was likely to be taken over by Zagloul Pasha, leader of the Nationalist party, whose partisans in the late elections carried a majority of the seats in the assembly.

Zagloul Pasha is not acceptable to the British Government, but the tension has been relieved by late advices that Zagloul has, willingly or unwillingly, withdrawn his candidacy and that the new premier is likely to be Adly Yeghen Pasha, constitutional Liberal.

The cabinet, under Ziwar Pasha, these advices add, has not yet resigned, nor has Adly Yeghen definitely accepted the premiership. Not much news from Egypt has reached London for some hours, and the position, therefore, is somewhat obscure, but for the present there is nothing to suggest important developments.

Say Prisoners Of War Were Killed

Spanish Want Riffian Leader Tried By Court Martial

Fez, French Morocco.—That 22 officers held prisoner of war of Abd-el-Krim did not die of typhus, as was reported, but were shot, bayonetted and clubbed to death by Krim's soldiers during the last days of the Riff defence, is the charge brought by Spanish investigators.

Their finding is based on accounts given by Spanish privates and non-commissioned officers, who were servants for the Spanish officers in the Riff prison camps.

It is expected that the present inquiry will be followed by a formal demand from Madrid for an official investigation, with the object of bringing Abd-el-Krim before a military court martial on charges of inhuman cruelty to Spanish prisoners of war.

It is learned that the Spaniards do not seek the death penalty for Krim, but prefer to have him sentenced to a long term of confinement in some Spanish military prison.

Is Offered Post Of Governor-General

General Opinion Is That Lord Willingdon Has Accepted

It is now officially admitted that Lord Willingdon has been offered the governor-generalship of Canada, and it is generally believed he has accepted the post. He will return home from China shortly, by way of Canada. The reason of his going to China by way of the Dominion was that he might sound out whether or not he would be an acceptable nominee for the position.

New British Trade Commission

A. E. Pollard, of London, Coming to Vancouver

Montreal.—F. W. Field, the British senior trade commissioner in Canada, announces that A. E. Pollard, of the department of overseas trade in London, Eng., has been selected to fill the post of British trade commissioner at Vancouver rendered vacant by the recent promotion and transfer of L. B. Beale to Wellington, N.Z.

Collides With Iceberg

St. John's, Nfld.—The British freighter Inerton, from Montreal for a European port, was reported making back to St. John's, with her bows stove in by collision with an iceberg.

Says Time Has Come To Abolish All Appeal To The Privy Council

Winnipeg.—Although saying that the privy council had generally discharged its high and difficult duties with ability, knowledge, skill, impartiality and rectitude, J. B. Coyne, K.C., in an address at the gathering of the members of the Manitoba Bar Association here, declared the time had come when Canada should follow in the footsteps of Australia and South Africa, abolish all appeal to that tribunal, and make the Supreme Court of Canada the last resort for Canadian litigants. He stressed the need of knowledge of climatic, social and business conditions on the part of the judges as a necessary equipment of those charged with the interpretation of the laws, and said that the courts of this country, having before them the great traditions and high purposes of the privy council, would not walk unworthily in the spirit that had inspired the administration of British justice.

In closing, Mr. Coyne said that speedy justice is the best justice, and undue delay in either trial or execution of sentence undermines the effectiveness of law. Sufficient safeguards, he said, have been provided in Canada against injustice, and urged that as a great nation, the conduct of administration of justice does not need a censor in London.

British Strike Deadlock

Negotiations For Settlement Appear To Be At a Standstill

London.—While a meeting of the International Miners' Federation was in progress in Brussels for the purpose of arranging further support for the striking British coal miners from workers in continental mines, negotiations with a view to a settlement of the strike were at a standstill in London.

Word has not reached London as to any action by Herbert Smith, president of the Miners' Federation, regarding the communication of Evan Williams, chairman of the Mine Owners' Association, which proposes that the miners and mine owners shall get together by means of small committees representing both sides, in an attempt to bring an end to the strike deadlock.

The miners are just entering the sixth week of their strike, and most of them, together with their families, are suffering severely.

Deny Hardship Stories Of Red Lake District

Newspaper Statements Contradict Judgment of Reliable Engineers

Ottawa.—Absolute denial of statements contained in newspaper interviews said to have given by W. F. Braun, a Pittsburg mine examiner, on the Red Lake district, was made in the House of Commons by J. R. O'Neill, Conservative, North Temiskaming.

Mr. O'Neill produced a copy of the interviews which appeared in a United States newspaper. Mr. Braun was said to have stated that "disappointment, hardship and death await gold seekers in the Red Lake district."

The statements made were in direct contradiction to the judgment of engineers of reliability and standing, said Mr. O'Neill.

Will Not Receive Degree

Cambridge University Withdraws Proposal to Honor Ramsay MacDonald

London.—Cambridge University has withdrawn its proposal to bestow the honorary degree of Doctor of Laws upon former premier Ramsay MacDonald, parliamentary chief of the Labor party.

Notification was given that there would be some opposition in the senate of the university, and Mr. MacDonald intimated that he had no desire to receive a degree by majority vote.

Sugar cane now can be harvested by a motorized machine that does the work of 100 men.

Higher Favorable Trade Balance

Canada's Excess of Exports Over Imports Greatly Increased

Ottawa.—Canada's favorable balance of trade (the excess of domestic exports over imports) was nearly $380,000,000 in the 12 months ended April 30.

This is nearly $100,000,000 more than in the 12 months ending April 30, 1925.

In the 12 months ending April, 1926, domestic exports were $1,315,000,000; imports $936,000,000. The excess of exports over imports was $379,000,000.

In the 12 months ending April, 1925, domestoc exports were $1,080,000,000; imports $795,000,000. Excess of exports over imoprts $285,000,000.

Obtain Weapons Too Freely

Are Too Many Permits Issued To Carry Arms

Ottawa.—"Too many people at present have the power to issue permits to carry arms," declared Commissioner Starnes, of the Royal Canadian Mounted Police, in testifying before the senate committee which considered Senator Belcourt's bill to restrict the importation, manufacture and sale of weapons in Canada. The measure proposes that license must be obtained for the importation, manufacture and sale of weapons.

Neither justices of the peace nor sheriffs should have the right to issue permits," Col. Starnes said.

The committee will meet again at the call of the chair.

Missing Evangelist

Los Angeles.—The Los Angeles Times says it has learned through confidential, but thoroughly reliable, sources that Mrs. Minnie Kennedy, mother of Aimee Semple McPherson, missing evangelist, is negotiating with two men who declare they will return Mrs. McPherson for the $25,000 reward recently offered by Mrs. Kennedy.

Control Beer Sale

Winnipeg.—The Manitoba Liquor Commission has taken control of the distribution and sale of beer in the province under an official order. The commission announced that hereafter beer must be purchased from the commission's offices situated in Winnipeg and various towns in the province.

Franco-Syrian Treaty

Paris.—A Havas dispatch from Constantinople says that the French ambassador, Albert Sarraut, and Tewfik Rushdi Bey, foreign minister at Angora, have signed a Franco-Syrian treaty. The treaty was negotiated several weeks ago by Henry De Jouvenel, French high commissioner for Syria.

Finish Drydock Soon

Victoria, B.C.—The new $6,000,000 government drydock here will shortly be completed. The gate is nearing completion at Yarrows, Limited. Tenders have been closed for the construction of two electrically operated cranes. This will be the last contract to be let before the official opening, about the third week in August.

Owing To Increase In Population World May Soon Be Facing A Very Serious Food Shortage

Soy beans, peanuts and bananas may rank among the world's most important sources of food and the consumption of fish will increase tremendously in the next century, thinks Dr. Samuel C. Prescott, head of the department of biology at Massachusetts Institute of Technology.

Speaking on "The World's Food Supply—Its Sources and Preservation," Dr. Prescott revealed that natural scientists, looking 100 years into the future, are already searching the earth for new sources of food and seeking means of conserving the known sources to avert a shortage in the next century.

It is estimated, he said, that the United States with a population of approximately 110,000,000 now, produces only enough food to feed a population of about 140,000,000. The fact that the world's population has doubled in 60 years, he pointed out is an indication of the importance of losing no time in finding new sources of foods and using the present supply more effectively.

The first great retrenchment in the world's food supply will come in meat, Dr. Prescott declared, in forecasting that the present generation may live to see a great proportion of its meat coming from the tundras of the Arctic and the countries of the tropics, where the goat and some types of cattle can be raised.

Land in the temperate zone now used for cattle raising will in the future be given over to intensive agricultural purposes wherever soil conditions and water supply will permit.

Corn will probably be more generally used as human food in the future, and additional use will be made of grains now often scorned, he said. Already a palatable flour is being made from bananas, which have practically the same nutritive value as potatoes, and such flour may find use in connection with cereals in supplying carbohydrates, according to Dr. Prescott.

Advantages Of Egg Grading

Results in Stronger Demand and In Better Prices

The advantages of egg grading are becoming more apparent every day and it is resulting in a rapidly increased per capita consumption. According to officers of the Dominion livestock branch this increased consumption has amounted to over ten dozen eggs per person in the last five years, and during that period prices have been more uniform and more profitable to producers than ever before. The great deterrent in the way of increased production in the past has been the fact that too often one egg found to be good was no criterion of what the next would be. Grading has resulted in a dependable product, thereby increasing the demand and maintaining the price.

Likes Canadian Cattle

Shipment of Steers Pleases a Former Opponent on Cattle Trade In Britain

Col. H. A. Mullins (Conservative, Marquette) said in the House of Commons that he had received a letter from Lord Bledisloe, under-secretary of state for agriculture in the British Government, stating that he had received 100 Canadian steers and that he was very much pleased with them. Lord Bledisloe was formerly an enemy of the cattle trade.

Colonel Mullins asked if anything was being done to facilitate the transportation of Canadian cattle.

Mr. Motherwell said that everything possible was being done. New plans were now afoot and later developments might be expected.

Butter and Cheese Exports

Exports of Canadian butter in March amounted to 119,512 lbs., valued at $58,351, as well as 2,547,000 lbs. of cheese, worth $664,206. In the year ended March, 1926, total exports of butter were 23,303,865 lbs., valued at $8,773,125, while shipments of cheese in the same period were 148,333,500 lbs., valued at $33,718,587. There was an increase in the value of both butter and cheese exported in 1925-1926 fiscal year, as compared with the previous twelve months.

Fox Farming in Manitoba

Fox farming has been making considerable progress in the Brandon district during the past couple of years. Two large ranches are now located quite close to Brandon, in which a large sum of money has been invested. A syndicate has about 57 pairs of silver black foxes, while a pool has about 17 pairs of the same kind of animals on a newly established ranch.

Big Oil Production

With a single well producing oil of exceptionally high quality at a rate of 140,000 barrels a year, the value of the oil resources of Southern Alberta seems about to be established. This well is the largest producing well in Canada.

Peggy.—"Does your husband talk in his sleep?"

Polly.—"No, it's awfully exasperating. He only smiles."

Fattening Pigs For Packers

Big Plant Being Successfully Operated In British Columbia

A big fattening plant is being successfully operated on a ten-acre farm on Lulu Island, British Columbia, by two men and their two sons. The men are E. North and J. H. Marshall. They have just extended their buildings and equipment, and are now fattening pigs and selling them to packers on a big scale. They have around seven hundred pigs always on the plant, ranging from weaners, bought locally, to three months old pigs, brought in by carload lots from Alberta.

Their output runs around thirty porkers per week and the turnover is at the rate of $80,000 to $90,000 per annum. They can't get anything like sufficient pigs in British Columbia to run their plant.

The pigs are all turned off at six months of age at least. Canadian barley is preferred to corn for fattening. Marshall, one of the operators, says, "Give pigs anything like a chance, feed them properly, and they will still lift any mortgage on any farm."

May Benefit Agriculture

Discovery Made By Member of Staff of the University of Alberta is Announced

A discovery which may be of far-reaching consequence to practical agriculture and especially to the cultivation of oats, has been made by Leonard Huskins, member of the staff of the University of Alberta, according to announcement in the London Daily Telegraph. Working under Professor Gates, of the department of botany at King's College, Cambridge, on the subject of genetics and cytology of oats, Mr. Huskins is said to have established the fact that "fatuoid" or "false wild" oats are a special type of mutation brought about by a loss of hereditary material known as chromosomes, or by an interchange of certain portions of them.

It is considered that as a result of Mr. Huskins' discovery the line of research for the total eradication of fatuoids should be fairly open.

Mr. Huskins is holder of one of the three scholarships offered annually in Canada by the Permanent Royal Commission for the Exhibition of 1851.

Britain Is Famous For Pedigree Stock

One Industry In Which Country Reigns Supreme

There is one industry—the breeding of pedigree stock—in which Britain remains supreme. From pigs to ponies and from sheep to shorthorns, British beasts are acknowledged to be the best in the world and are bought by foreigners at high prices to improve the foreign breeds. During 1925 the Russian Government bought from British breeders 250 pedigree pigs.

England has always been famous for her cattle and her sheep. Nearly 300 years ago huge oxen were produced there. In his diary, Evelyn speaks of an ox that was 19 hands high and four yards long, and that was in 1649. At that date Leicestershire sheep had already obtained a great reputation and fetched big prices. The marvellous sheep of New South Wales, one of which recently yielded 45½ pounds of wool at a clip, are of purely British descent.

England Improving Highways

Blossoming Trees Transform Main Routes Into Shady Avenues

A vision of highways transformed into shady avenues of flowering trees is created by the suggested improvements for the new arterial roads that are appearing in all parts of England. When these were first constructed it was found that, though they served their main purpose well, they still appeared broad, smooth tracks without any claims to beauty.

Under the Roads Improvement Act, passed in August, 1925, it is possible to remedy this fault in several ways. The most practicable method, and one that has already been adopted in certain instances, is to line the bare stretches with blossoming trees planted at short intervals.

Middlesex is the first county to attempt to beautify its roads in this fashion, and by the end of the year 30 miles of the main routes in this county will be turned into fine avenues of trees.

Sheep Ranchers Come To Canada

Several sheep raisers from the United States have recently made extensive purchases of land in the interior of British Columbia. Sheep raising on a large scale will be conducted in territory previously considered suitable only to the cattle industry.

At A Standstill

"Yes," said the young writer, "I've got pretty deep into my new novel now."

"Ah," remarked his friend, "the plot is thickening, eh?"

"Yes, I guess it is; at any rate, I'm stuck."

Manitoba Farm Boys' Camp

Party of Ninety Boys From Rural Manitoba to Attend Brandon Fair

Arrangements are well under way to entertain at the Provincial Exhibition, Brandon, a party of ninety boys from all parts of rural Manitoba. Teams composed of three boys, ranging from fourteen to nineteen years of age are representing their respective districts, at the third annual Farm Boys' Camp, which is now one of the leading features at the provincial exhibition.

This year the camp will open the evening of Tuesday, June 29th, and will continue until Friday evening. While in camp the boys will be the guests of the exhibition board.

The livestock judging competition, which is a feature of the camp, will commence Wednesday morning. Classes of horses, beef and dairy cattle, sheep and swine, will be judged by the boys.

The McKirdy Cup, which is competed for annually goes to the team scoring highest. Gold medals donated by the Manitoba department of agriculture will be awarded to each member of the winning team; silver medal to the second highest team. Liberal cash prizes are offered to those scoring highest in each class of stock. Mr. James A. Richardson, of the Winnipeg Grain Exchange, has donated a handsome gold watch for the boy with the highest aggregate score and a silver watch to the second highest aggregate.

In addition to the judging competition, an interesting programme is being arranged. This will include an evening on the grandstand, an opportunity of seeing all departments of the exhibition, a visit to the Dominion experimental farm, and points in and around Brandon.

Entries have been received from some twenty-five points throughout the province. Some of the new points entering a team for the first time include Grosse Isle, Swan River, Griswold, Oakville, Chater, Ethelbert, Virden, Morris and Neepawa.

Egg-Laying Contests

Improvement Brought About By Better Selection of Individual Birds

The Canadian national egg-laying contests have now been in operation for six years. In a survey of the work in his latest report the Dominion poultry husbandman states that the average production in the last year was 172.2 eggs per hen as compared with 122.5 eggs in the 1919-20 contest. This striking improvement was in a large degree brought about by better selection of individual birds used in the contest, choosing pullets of proper age and development, advanced methods of breeding, and improved contest management. Production costs in the contests show that the average bird brings a net income of $2.80, which is a fairly good profit.

Impressed With Canada's Wealth

Resources Worth Working For Says Duchess of Athol

The Duchess of Athol, under secretary of state for education, who has returned to London from a tour of Canada is considerably impressed with the latent wealth of the Dominion.

In an interview the Duchess said that while Canada was already a great and wealthy country, the resources yet to be developed were well worthy of all the toil sons and daughters of the British empire could devote to it.

One conclusion which had been formed on her trip, she said, was the paramount need in Canada for more male and female immigration of the "right sort."

Brazil uses convict labor in much of its road construction.

Brazil occupies an area equal to that of Europe.

Returns With Good News

Toronto Man Predicts Another Banner Year For Western Prairies

The summary of western crop conditions brought back by Mr. Thomas Bradshaw, of the Massey-Harris Company indicates another banner year for the prairies. Of course many things may happen between now and harvest time, but it is more than encouraging to learn from such an expert observer that the wheat crop promises to equal that of last year and that the people are in a more optimistic mood than at any time since 1915. Much of Canada's present favorable condition is due to last year's crop and the high prices which prevailed. A repetition of this crop and an approximation of the same prices would raise the position of the country to a point where it could withstand even a lean year or two.

Of the $1,150,000,000 of wealth which the farms produced, more than half came from the western wheat fields from a smaller acreage than was sown in 1924. Considerable of this return has not yet reached general circulation, but it has already had a marked effect on the prosperity of the whole country. A duplication of these figures should submerge every the blue-ruin spellbinders.—Toronto Globe.

Canadian Cattle Popular In Britain

Profits Would Increase If Shippers Exercised More Care In Selection

Canadian cattle are rapidly gaining popularity in Great Britain, the numbers shipped having steadily increased since the embargo was lifted in April, 1923. About 111,000 head were shipped in 1925, an increase of 31,000 over the previous year. The total declared value of the shipments in 1925 was $11,796,683, or an average of $106.40 per head, as compared with $8,402,377, or $105.77 per head in 1924.

Were the Canadian shipper to exercise more care in selecting the type of animals in demand in Great Britain, his profits would be considerably increased, according to a bulletin of the department of agriculture at Ottawa on "Shipping Cattle to Britain," which contains much valuable information for those engaged in the industry. When they can get really good Canadian cattle, the British commission men and graziers prefer them to Irish cattle, as they are healthier and make more rapid gains.

But the animals in demand are of the highest beef type. Inferior animals are not kept for finishing, but are slaughtered at the port of entry. These consequently yield smaller returns to the shipper.

Saving Nitrogen Fertilizer

New Product May Soon Be Placed On Market

Each year 240,000 tons of nitrogen are lost down the sewers of the United States. The first step in the recovery for the farmer of this essential plant food has been taken through the erection of an $8,000,000 sewage disposal plant at Milwaukee, Wisconsin. By using a new method of sewage disposal, Milwaukee plans to accomplish the double purpose of purifying her water supply and of placing on the market a new organic fertilizer.

Real Estate Values

The United States paid $295 an acre for the Virgin Islands, $35.80 an acre for the Canal Zone, 28 cents for the Philippines and 2 cents for Alaska.—Dearborn Independent.

Thieves who used anaesthetics to prevent squawking have stolen 12,000 chickens in Chicago recently.

Bad news and soft-boiled eggs should be broken gently.

Profitable Lamb Feeding

Illinois Man's Method For Preparing Stock For Market

"Buying right and selling to advantage are only half the battle in profitable lamb feeding," F. B. Lloyd, of Sycamore, Ill., says. He fattens 600 lambs a year on his 240-acre farm.

"For the first sixty days it costs little to put on ten pounds of gain per head. The lambs have the run of cornfield, meadow, pasture and stubble, picking up feed which otherwise would go to waste. At night they get a handful of barley and a little clover or alfalfa hay. If the rustling is good the lambs don't care for much other feed.

After sixty days I shut them up and feed barley and hay. During the last six weeks I feed a little corn. Usually they top the market if they have had half a start while on rough feed.

As a rule I keep lambs four to five months, depending upon the market. By this time a 55-pound feeder will weigh about 80 pounds, the size liked best by buyers. If the market gets to acting up during the feeding period because of the first cheap ten pounds, I'm in position to dump them at the original price, or even a little less, and still be ahead."

Adds To Land Values

Alberta May Tax Farms Past Which Telephone Wires Are Strung

The Alberta Government has suggested a tax on lands past which telephones wires are strung, and there has been quite an outcry against the proposal. Why, says one, should a farmer pay for something which he does not want in order to help another man secure a phone? But the phone users point out that often the main line may pass many unused farms which are held for speculative purposes and as the running of the telephone past these farms certainly adds to their value, why should they not pay for the added value? It is significant that the United Farmers of Alberta have placed their imprimatur upon the proposal, and it will probably become law.

Excellent Ranching District

Shipment of Cattle Sent 600 Miles North of Edmonton

A large number of cattle were sent this spring to the Fort Fitzgerald country, 600 miles north of Edmonton. They were taken by train to McMurray and thence by boat to their destination. Although the Fitzgerald district is far north, on the limits of Alberta's boundary, it contains an excellent farming and ranching area and has been proved suitable for the raising of livestock. This will be Canada's farthest north ranching district.

Influx Of Settlers

Number of Settlers Arriving Greater Than Any Year Since 1912

During the first three months of this year, 14,000 immigrants came to the west, and it is believed that almost as many came to this country during the month of April. Six thousand immigrants came to Winnipeg in one week during March, 2,100 of them within a space of twenty-four hours. This influx has shattered all records since 1912. Many of these people have enough to commence farming operations and practically all of them are of the agricultural class.

Saskatchewan Egg Pool

The new Saskatchewan Egg Pool within one week shipped from the Saskatoon branch seven carloads of eggs to Montreal and eastern points. As many as three hundred cases of eggs a day are being received and Saskatoon's daily total exceeds the combined daily receipts of all other provincial branches.

Pleasure Tours Instead of Train Trips During English Strike

Not even a general strike involving some four million workers interfered with Canadian Pacific Railway transportation in England. The company held huge char-a-bancs in readiness to convey passengers from inland cities to seaports where the vessels they wished to board were leaving. Above are shown passengers for the Canadian Pacific liner Montroyal leaving the company's offices, Trafalgar Square, London, for Liverpool, on Thursday, May 6. The motor cars ran on regular train time schedules, giving the travellers ample time to make the usual arrangements. All of the travellers voted the motor trip through England well worth while. At its best in May, old England presents beautiful rolling downs, long shady roads and charming views, affording a two hundred mile pleasure tour instead of a mere train run. In order to carry out all obligations fully to patrons the Dominion Express Company had a complete fleet of motor vans chartered to deliver and receive shipments during the strike.

Points The Way To A Stronger National Sentiment And A Stronger Canadianism

Lightens Farm Tasks

Pittsburg Farmers Cultivate Crops to Music of Radio

Farmers and commuters in the southern border of Pennsylvania are cultivating their crops to the music of radio. No longer is there a question of keeping the hired man in the fields till sundown—not when he can ply his hoe in time to his favorite jazz. No longer do the boys run off to the village when the baseball scores and music by the band is carried to them by the loud speaker erected in the farmyard.

In Western Pennsylvania the sun is still high in the sky and it is but mid-afternoon on the farm when the eastern stations begin their programmes. Why should the music be lost? The farm lads place the receiving set on the wheelbarrow, erect a temporary aerial, drive an iron pin in the soft ploughed earth for a ground and tune in.

The craze for outdoor radio reception has spread and cabinet sets are readily transferred from the houses to wheelbarrows, express wagons and dog carts and carried to the fields and gardens. Music keeps the boys at work, the farmers say, and the commuters, while tilling their gardens and flower pots, do not miss the programmes to which they were accustomed during the winter.

Canada Could Extend Market

British Honduras and Other Southern Countries Would Buy Canadian Products

Canadian manufacturers are losing much by not paying more attention to their Central and South American trade, in the opinion of his excellency Major J. A. Burdon, C.M.G., governor of British Honduras, who spent a day at the Fort Garry Hotel, Winnipeg, recently. His excellency called attention to the fact that Canada exports very little outside of wheat products to the countries on the equator, and stated that the United States and Germany are selling goods there which might well be sent from Canada. People in those countries, and in British Honduras especially, would buy Canadian goods if they were offered in the right way, he said, but so far Canadian merchants have not gone to the trouble to present their goods in a manner which appeals. While 98 per cent. of the flour used in British Honduras is from the Canadian west, there is an appalling scarcity of other goods, he said.

Silkworms Much Sought After

Is Only Insect That Can Produce Real Silk

The real silkworm silk is as much sought after as ever, in spite of the enormous increase in the production of artificial silk. Many attempts have been made to find other insects to produce the real silk, but none have been successful. The oddest source from which some silk has been obtained is a shellfish, a sort of mussel found in the Mediterranean. It is called the "pinna." This insect fastens itself to rocks with long, fine threads which can be spun into gold-yellow silk. The thread is very short, however, the filaments being not more than three inches long. It takes more than three thousand little fish to produce one pound of silk. A small amount is produced and worked in Silician coast villages.

Special Prizes For Royal Winter Fair

Offered By W. A. Jenkins Manufacturing Co., of London, Ont.

Cattle exhibitors at the 1926 Royal Winter Fair are offered special prizes amounting to $200 by the W. A. Jenkins Manufacturing Co., of London, Ont. For best Shorthorn senior steer calf, prizes of $40, $20 and $10 are offered; for best grade senior calf or pure-bred other than Shorthorn, Hereford and Aberdeen-Angus, three prizes of similar value, and for junior Holstein heifer calves, calved on or after January 1st, 1926, they offer three prizes of $30, $20 and $10. Conditions under which entries may be made, can be had on application to the company.

Alberta Farm Revenues

Gain Shown of Twenty-five Per Cent. Over Previous Year

A twenty-five per cent. gain in the farm revenue of Alberta last year, as compared with the previous year, was the record made by this province. Aggregate farm revenue was $245,663,000 out of an estimated total from all branches of production of $314,080,000. Of this total, revenue received from field crops was $194,356,000; farm animals, $24,972,000; dairy products, $17,015,000; poultry and eggs, $6,859,000. There are also a number of smaller items.

A micro-micro-second, a millionth of a millionth of a second, can now be measured by a new invention.

If a married man is polite, you never can tell whether he's chivalrous or scared.

Sir James Aikins is one of Canada's constructive speakers and his address to the members of the Montreal Junior Bar is a notable and noteworthy characteristic. It points the way to a stronger national sentiment and therefore a stronger Canadianism. There is no pursuit and no action that does not require united operation, and national co-operation in Canada can be effected only through the different sections and different classes striving to understand one another's conditions of life and work, and trying to realize as far as possible one another's point of view. Sir James Aikins' speech displays a disposition to direct every possible means to this end. He finds in the older provinces of Quebec and Ontario inspirations of spirits, visions of hope that as they are realized will enhance the greatness, progress and prosperity of the Dominion, and kindred sentiments, he tells us, are being firmly fixed in the minds of young Canadians in Western Canada. First affections naturally belong to one's own province, but there must be a willingness to comprehend all the other provinces and bring them within the scope of liberal consideration. As Sir James put it. "Love your province first and endeavor to make it the best. Then try to see Canada as a whole." In this way Canada may be made strong as a nation, enabled to take advantage of her opportunities and become a leader in the coterie of nations known as the British empire.

To this end, something more than the natural growth of population is needed in a country of such vast extent. The natural law of increase must be aided by immigration from abroad. This was advocated by Sir James with the reservation that people who are allowed to come into the Dominion from foreign lands shall be subject to careful control. He went on to deplore Canada's tendency to become a "population exporting country," and stressed the need of keeping young Canadians at home in order to realize fully the great opportunities of the country." The reality of the need is fully recognized. The huge magnet to the south continues to attract to it many of Canada's enterprising and adventurous citizens and no doubt it is inevitable that it always will attract a certain number, but a government with an aggressive, enlightened policy could reduce and simplify the costs of public administration, bring about a reduction of taxation and enhance trade, and thereby reduce emigration to the irreducible minimum. But this is a political phase of the question which Sir James Aikins of course did not touch upon or suggest. He confined himself strictly to national aspects, pointing to Canada as a quarter of the world in which right efforts put forth will be certain to bring about prosperity on a gigantic scale. Canada has a great national destiny and the spirit that permeates the speech of Sir James Aikins is calculated to encourage all who are anxious to challenge that destiny.—Montreal Gazette.

Would Teach Housewives

Advocates Expert to Educate Housekeepers Re Points On Beef

Several speakers at the annual meeting of the Eastern Canada Livestock Union held in Toronto emphasized the need for a "better beef" campaign throughout the Dominion. Equal in importance with the necessity of improving the quality of beef was the necessity for educating the consumer to an appreciation of what good beef really meant.

W. H. Porter, of London, Ont., advocated the employment by the federal livestock branch of an expert who would be available for educational work among consumers, to give practical demonstrations of the difference between good cuts and poor ones. Canadian housewives, as a general thing, did not know good beef declared Mr. Porter.

Alberta Poultry Pool Office Moved

Headquarters Have Been Changed From Calgary to Edmonton

On May 1 the head office of the Alberta Co-operative Poultry Producers, Limited, was moved from the Lougheed Building, Calgary, to the building occupied by the Provincial Egg and Poultry Marketing Service, Edmonton. D. M. Malin, manager of the provincial marketing service, is now secretary of the pool and will have charge of the head office. All pool contract signers will ship to the Egg and Poultry Pool at Edmonton, Calgary or Lethbridge, whichever is nearest to them. The provincial marketing service is sales agent for the pool and, under the new arrangement, is in a position to give the pool efficient service.

Alberta Sands For Paving Purposes

Definite arrangements for testing the McMurray sands for paving purposes have again been entered into between the Edmonton civic authorities and Thomas Draper, owner of extensive holdings in the north. Similar experiments to those made last summer will again be performed.

Men resemble whales. They no sooner get to the top than they begin to blow.

Pole Flights Have Boosted Aviation

Polar Flights Should Stimulate Use Of Aircraft For Commercial Purposes

In the third installment of his vivid account of his flight from Spitzbergen to the North Pole and back in an aeroplane, Lieutenant-Commander Byrd asserted that, while he regretted not to have discovered land, one thought compensated him and his pilot, Bennett, while wrestling with difficulties and facing dangers—namely, that "business need no longer hesitate to take up aviation with a bang."

Commander Byrd was not mistaken or unduly optimistic. His feat is certain to advance commercial aviation.

Amundsen, flying over the pole in the dirigible Norge, had ampler opportunities for exploration. It is estimated that he and his companions explored about 60,000 square miles in their flight from Spitzbergen to Teller, Alaska, allowing them a field of vision averaging fifty miles. The crew of the Norge saw no land. They may have established the fact that there is no great body of land in the 1,000,000 square miles of the previously unexplored Arctic area.

The possible existence of small islands or volcanic peaks on either side of the path of the dirigible in that area is admitted. Other explorers will continue the valuable work of Byrd and Amundsen and remove all doubt as to that not unimportant point.

Like Byrd, Amundsen may well entertain the hope that his epoch-making flight will stimulate the use and improvement of aircraft for commercial purposes. The question of protecting the dirigible from pieces of ice broken from the structure and driven back into it by the propeller blades will demand serious attention. The danger from that bombardment, not sufficiently realized by the builders of the Norge, might have caused disaster.

A dirigible is a frail craft and in the Arctic regions good fortune is rather the exception than the rule.—Chicago Daily News.

Sultan Of Morocco Has Peculiar Hobby

Is Intensely Interested in All Kinds of Mechanical Devices

The Sultan of Morocco has made mechanical devices his royal hobby. Trick blocks, music boxes and bicycles are the favorites.

Among his recent acquisitions is a set of six musical armchairs made especially on his order at Zurich for use at diplomatic functions. Each chair plays a different national anthem when sat in. One plays "The Star Spangled Banner," another "God Save the King," another "The Marseilles," and the other three play the national hymns of Spain, Italy and Gearmany.

The chairs have a special attendant, whose duty it is to see that the right diplomat sits in the right chair.

The sultan also has bought five motor cycles, three for his sons and two for the sons of his deposed brother. In addition, he has purchased ladies' bicycles for his younger wives, two electric player pianos and a number of Swiss mechanical clocks, one of which sends a miniature train from a roundhouse to make a tour of the room on a miniature track every hour and one-half.

He also has acquired a bright red hansom cab done in complete vermillion lacquer, fitted with silver trappings and purple harness.

Training Begins At Home

Children Properly Brought Up Seldom Get Into Trouble

More statistics, gathered from juvenile court records, show this: Children who come from homes where are Christian influences, where there is regular attendance at day school, where there is an effort to discharge the full obligation of father and mother, very seldom come to court. In the majority of courts such cases are so rare as to be practically non-existent. That means something—the crime wave, if it is to be checked, must be stopped at the start, and the home is the one place to stop it. The country is paying the price for taking down the homely old motto that used to be worked in colored yarn, "God Bless Our Home," and putting up in place that modernism, "Let's Go."—Stratford Beacon-Herald.

Manitoba Honey Production

Honey production has now become a recognized phase of mixed farming in Manitoba, and production figures for the past few years have shown a steady increase. Last year over 4,000,000 pounds of honey were produced in the province, having a value of $600,000. The latest statistics on this industry show that the province has 2,000 beekeepers, with 27,000 registered hives.

"Why do you feed every tramp that comes along," said the husband, peevishly. "They never do anything for you."

"No," responded his wife, "but it's some satisfaction to see a man eat a meal without finding fault with the cooking."

What Solomon Escaped

If there had been automobiles in the days of Solomon, think of the trouble the old gentleman would have had with 800 wives on the back seat telling him how to drive.—Watertown, N.Y., Times.

W. N. U. 1632

Young Scotsman's Opinion

Tells of Advantages of Agricultural Instruction in Alberta

H. Macpherson, a young Scotchman, who was among the first group of boys from the British Isles to study agriculture in Alberta at Vermillion School of Agriculture, writes in part as follows of his experiences in Alberta, in the Stirling Journal, from his farm at Mirror, Alberta:

"I just wonder if you boys are content to stop at home when there are wonderful chances in Canada waiting you. As you are no doubt aware, Western Canada is noted for farming, grain and dairy produce, and there are immense tracts of land awaiting cultivation. Why not come to Sunny Alberta and go in for farming?

"To any who are considering this step, I will give some useful information. In the first place, I would advise studying farming conditions in this country at any of the three agricultural schools in Alberta—Vermilion, Olds or Claresholm. As my experience has been gained at Vermilion, I will describe that school, though the other two are identical with Vermilion. The session starts on or about 25th October and finishes on the 25th March. Even though a student on commencing has absolutely no knowledge of farming, he leaves the school with valuable knowledge which will stand him in good stead when he starts farming on his own. Team work (driving horses), cow barn work, feeding the stock, blacksmithing and carpentry, instruction in use of farm implements, and lectures on farm mechanics, farm management, soil chemistry, dairying, etc.

"Nothing is omitted, and at the end of the term, the students are placed on suitable farms, personally selected by the principal of the school. The tuition is quite free, but the student is required to furnish money for his board during the five months, $155, and also money for personal use. There are plenty of social activities at the school—dances, skating parties, ice hockey games, literary activities, etc. Suitable accommodation is provided for students at houses in town, these being personally selected by the principal."

Providing Shade For Fowl

Possible For Them To Get Too Much Sunshine

Fowl love the sunshine. It is the best tonic they can possibly get, but it is quite possible for them to get too much of this good thing. When summer comes the hot sun beats down from early morning until late evening, and unless something in the way of shade is provided the fowl will suffer severely.

Most poultry houses face the south. In many cases the run is in front of the poultry house and the building itself provides little or no shadow into which the fowl may go. Poultry keepers should study the situation in their hen runs. There should be a shady spot somewhere for the hens at all hours of the day. If shade is lacking provision should be made so that this will be provided.

By early planting of sunflowers and artichokes outside the wire fence of the run these large leafed plants may be grown before the summer is here. Both grow to good heights and, if planted fairly close together, will cast a heavy shadow. They are useful on the east, west or south of a run fence. To the north they would be useless as their shadows would be cast in that direction. Don't neglect this aid to the comfort of the fowl. Fowl that have their comfort looked after keep well and lay well.

Had A Good Reason

Logical Excuse of Bachelor For Making Long Pie

Dr. Harvey W. Wiley, the food expert, ended a eulogy of rhubarb with an anecdote.

"There was a bachelor mason in my native Kent," he said, "who used to cook his own food, and one day he came to work with a pie over two feet long fastened to the top of his lunch basket.

"'What have you got there, Joe?' the boss asked him.

"'A pie. What do you think?' said Joe.

"'But look at the length of it,' said the boss.

"'Well,' Joe growled, 'the rhubarb was that long.'"—Chicago Daily News.

A Thousand Years Hence

Our clothes of the future will be so equipped that while men are, for instance, enjoying themselves at a dance at night they will be absorbing energy from the ether. In the future, thanks to the evolution of the radio this will not be dissipation at all, but a night spent in such a way will be fully as refreshing as eight or ten hours in bed.—Washington Herald.

Big Movement of Settlers

More than 1,300 new settlers registered at the Immigration Hall in Edmonton during the month of April. This is the largest number to arrive in that part of the province in any one month since 1924, which indicates a definite upward move in Canadian immigration.

Selection Not Appropriate

Restaurant Manager (to orchestra conductor)—"I wish you would display a little more tact in choosing your music. We've got the National Association of Umbrella Manufacturers here this evening, and you've just played 'It Ain't Gonna Rain No More.'"

Just Need Fair Excuse

Divorce Among Bush-Negoes of South America Very Simple

Marriage in the jungle among the Bush-Negroes of Suriname, is not an elaborate performance, says John W. Vandercook in an account of his last visit to the northern coast of South America, in the May Harper's Magazine. He writes:

"Bush-Negro girls usually marry for the first time when they are 15 or 16, but this first love is by no means the last. The Bush Negroes consider women as the fickle sex and have patiently provided for their whims. Or perhaps the matriarchs themselves created the system. A woman may leave her husband at any time if she has what public opinion admits to be a fair excuse. If her husband is lazy, a poor provider, or simply dull, that is ample reason for him to be deserted.

"The divorce is quite simple. The lady either locks her front door or moves. In the first case the husband no longer has right of entry to his wife's abode. The house where she lives is, and has always been, her house. It belongs to her family. The husband heretofore has come and gone freely, but now that he is barred he may no longer trespass, even though he has erected the hut with his own hands for the use of the bride! But the husband still has his own house which he has used during the marital period as a storehouse for his most treasured possessions. It is his haven."

"Mystery Peak" In Rockies

Believed By Geologists To Exceed Mount Robson In Height

The highest mountain in British Columbia may not be Mount Robson after all.

At the head of Bute Inlet, and lying not more than 150 miles north of Vancouver, is a "mystery peak" that may turn out to be the highest point in all this province.

Dr. Victor Dolmage, of the Dominion Government geological survey asserts that the great peak is well over 13,000 feet high, and he believes it exceeds in height Mount Robson, so long the unchallenged monarch of the Canadian Rockies.

"Mount George Dawson" is the name the geological survey has suggested to the Geographic Board of Canada as a name for the big mountain to commemorate the eminent Canadian geologist whose first work was done near the head waters of the Homalko River.

Ownership of the Pole

Contends That the North Pole is International Territory

If observations of Captain Amundsen and Lieut.-Commander Richard E. Byrd are correct, and there is frozen or open water at and around the North Pole, then the North Pole is international territory, in the opinion of A. B. Clute, lecturer in law at the University of Toronto.

The question of ownership of the pole is brought up by the application for admittance into the United States, duty free, of films taken at the North Pole, on the ground that they were made on United States territory.

Reverse Heads On English Coin

In the design of the English penny it is the custom to reverse the head of the sovereign with each succeeding reign. Thus, the head of King George looks to the left, while on the King Edward penny the head looks to the right. Victoria, like her grandson, looks to the left.

Patriotism

True Patriotism Nurtured Almost Of Its Own Accord

Patriotism is not a thing that can be bought nor can it be forced into people without its nature undergoing a chemical change in the process. When it is so forced in, it becomes as much of a drudgery as compulsory drill or enforced churchgoing. True patriotism is something that sprouts almost of its own accord. It is nurtured by gratitude, not by favors received at the hands of a privilege-bestowing government—by equality of justice. Given these things in America and the democratic faith is saved.—N. Y. Nation.

Nightly Sleep Series Of Naps

Experiment Shows Restlessness After Every Eleven and Half Minutes

The eight hours of sleep which the human being allots himself nightly is a series of eleven-minute cat naps, psychologists were told recently by Prof. H. I. Johnson, of the Mellon Institute, Pittsburg. He presented the findings of experiments made with sleeping persons whose rest was recorded by apparatus attached to a hanging bed on which the subjects slumbered.

The average rest period of the subjects was eleven and a half minutes. After that length of time the sleeper fidgeted, rolled over, changed his position, and relaxed again for eleven minutes and a half more.

Upsets A Popular Belief

Statistics Show Men Are Greatest Consumers of Candy

The popular idea that flappers and children are chief consumers of candy went overboard at the tenth annual convention of the Associated Retail Confectioners of the United States at Chicago.

"Close observation," said the statisticians of the association, "establishes the fact that men not only do most of the candy buying, but they do more than half the eating."

"Ever since the days when the aborigines of Central America used the cocoa bean for currency man has been the greatest patron of the candymaker," it was stated.

Surplus Of Women

Claim There Are 2,000,000 More Women In Britain Than Men

Great Britain has a surplus of 2,000,000 women over men, many of whom are anxious to come to Canada, said Miss Rachel M. Ard, O.B.E., J.P., member of the Kent Migration Committee, in an interview at Montreal.

For the past 17 years Miss Ard has been working in England in the interests of Canadian settlement. She is going west where she will spend the next four months and a half studying Canadian conditions. Miss Ard has lived in Alberta and British Columbia.

Danger In Sun Treatment

Noted Physician Says Care Must Be Taken Or Results May Be Fatal

Sir Henry Guavin, of London, Eng., has issued a warning against the abuse of sunlight treatment, and has advised parents to have the advice of physicians before they submit their children to extended sunlight treatments.

In the opinion of this distinguished doctor there is a tendency to overdo the use of sunlight in the treatment of weak children, and he says it may even be fatal if an ailing child is exposed to the sun for too long a period.

Criticism Of Burbank Resented By Friends

Late Distinguished Horticulturist Neither Agnostic or Atheist

Friends of the late Luther Burbank, the great horticulturist, are indignant over the sensational stir roused over his religious creed. That he was neither agnostic or atheist, but a true Christian is affirmed by the friends of Burbank, who point out that Rev. Mr. Pidgeon, of Los Angeles, would hardly have asked him to preach in his church, a Methodist edifice, had he not been convinced of his Christian principles.

Mrs. Harriet G. Roberson, a noted lecturer of the United States, who teaches curative Christian psychology, also is convinced of the Christianity of Burbank, who had highly commended the pledge, which is given to the Roberson groups throughout the country. This reads as follows: "Resolved—To make God first in my life; only permit myself constructive thinking; believe in myself, others and God, earnestly endeavor to reach my visualized goal; remove doubt, fear and worry from my life; seize each opportunity to say the encouraging word; only speak of worth-while things." If he were not Christian, Burbank could not commend these Christian precepts, said Mrs. Roberson. Altogether the sensational reports of his religious tenets have placed the distinguished horticulturist in a very wrong light, say his friends, a poor return for the inestimable services Burbank rendered the world.

Plant Lice

Plants Infested Should Be Sprayed With a Contact Insecticide

Cabbage, turnips and other vegetable crops, as well as many plants in the flower gardens, are often seriously injured by plant lice or aphids. There are many different kinds of these plant lice in Canada. Some are green, other dark colored, and some red. They are all sucking insects and live solely on the juice which they extract from their host plants. Some kinds feed on the under side of the foliage, others cluster on the stems of plants, and others again are found attacking the roots. Plants should be examined at frequent intervals and when the insects are first noticed they should be sprayed with a contact insecticide such as kerosene emulsion, whale oil soap, or a tobacco preparation. Trade preparations of nicotine are sold by all seedsmen. Whale oil soap is used at the rate of one pound to four gallons of warm water for black aphids, and one pound to six gallons for green ones. To make kerosene emulsion, use two gallons of kerosene to one gallon of water and half a pound of soap. Heat the water and dissolve the soap in it, then pour in the kerosene, churning violently until a thick creamy emulsion is produced. This makes a stock solution which cools into a jelly-like mass. When required for use, dilute with nine times its measure of warm water. The insecticides must be applied so as to reach the places where the insects are clustered. Only the plant lice which are actually hit by the spray will be killed.

New Grain Area

A number of farmers in the interior of British Columbia are sowing wheat this year. Living in the vicinity of the Canadian National line to Prince Rupert, they are preparing to take advantage of the elevator facilities now available at that northern Pacific port, which is 500 miles nearer the Orient than any other North American port.

The King Of Metals

Many Reasons Why Platinum Is More Valuable Than Gold

Mere claim that a thing is worth its weight in gold is no longer up-to-date. The yellow metal may have served its purpose as the standard of an earlier generation, but modern conditions call for a new measure of value. Today's practice is to declare that a treasure is worth its weight in platinum.

In this valuable product of the mines the world has a white king of metals that knows no competition—a contribution which surpasses gold in many ways that make a metal beautiful, useful and desirable. Platinum has the qualities of gold in that it is impervious to all influence of rust and corruption and decay. In these particulars neither metal has the advantage. Sufficient explanation of the greater value of the white treasure is found in its relative adaptability to the art and its lasting qualities in fine carvings and filagrees.

Gold has been highly esteemed for the making of fine filaments. By expert workmanship the yellow metal may be beaten down to threads so thin that a thousand of them may be laid side by side in the space of a single inch. Fine as it may seem, this point may be described as merely the beginning when it comes to the treatment of platinum. With this metal it has been found possible to produce wires drawn out to such thinness that ten of them are required to equal the bulk of the finest spider web. In cold figures the platinum wire is so fine that ten thousand of them are required to cover an inch.

This is one of the factors which causes platinum to sell at a price approximately five times the price of gold. In the world's market places the quotation for gold is in the neighborhood of twenty dollars an ounce, the cost of platinum ranges around $115 or $120.

Best Risks For Anaesthetic

Weaker Persons Usually Prove Easier and Safer Cases

It is a popular fallacy to believe that those in good health, with good muscular development, are the best risks for anaesthesia. This is not invariably the case, though as against those with organic disease of the heart and lungs, etc., they are much safer risks, but these being absent it is usually found that the weaker, asthenic subjects, who have lain in bed for some time, prove much easier and safer cases for anasthesia. These were statements of Dr. R. W. Webster, of Winnipeg, Man., at the Ontario Medical Association convention at London, in an address on "The Choice of an Anaesthetic."

"A number of methods have been devised in an attempt to predict beforehand the probable risk to life incurred by a patient from the proposed operation. The breath holding test has been strongly advocated as an index of the patient's suitability for operation. The normal individual can hold his breath for about 45 seconds. Persons with weak cardiac muscle can hold their breath only from 10 to 20 seconds."

Dandelion Contains Most Iron

Also Has More Lime Than Lettuce Or Spinach

The element of iron in our food is important, for it is a tonic and a blood-purifier. Therefore, when you look for the foods that contain iron, you may be surprised to learn that the plant that contains the most iron is the little, often unappreciated, dandelion! The dandelion contains as much iron as spinach, with fifty per cent. more lime. It has four times as much iron in it as lettuce has, and more than twice as much lime. It is also excellent roughage food, which sweeps the stomach gently like a broom.

Decline Of Conversation

There just doesn't seem to be any time for conversation now. It used to be Wichita's most popular recreation. It is now run over by the automobile, overshadowed by the movie, drowned out by the radio, crippled by the card game and just generally relegated to a rear seat along with everything else which demanded a certain amount of leisure to live.—Wichita Eagle.

Big Oil Production

The Royalite No. 4 well, in the Turner Valley field, is producing more oil now than all the wells in the province of Ontario together, according to an authoritative statement. The total Ontario production for 1925 was 143,000 barrels, which was less than the total production of the Royalite well.

The Last Thing

The Vicar—"Fancy Mr. Jones going into a room which strongly smelt of gas with a lighted candle! I should have thought it would have bene the last thing he would ever do."

Mrs. Jones—"So it was, sir."—Popular Science.

Big Farm Sold

What is known as the Kong Farm, of 2,560 acres, a short distance south of Grassy Lake, Alta., has been sold for $115,000, which is an average of about $45 an acre.

The majority doesn't always rule. One bad little boy sometimes gets a dozen good little boys into mischief.

It is the people who come early to avoid the crowd who make the corwd.

Marquis Wheat Won The War

Says Development of Famous Wheat Had Bearing on Success of Allied Cause

The vexing question, "Who won the war?" has been answered by the Standard, a leading English newspaper in Buenos Aires, Argentine. Recently the Canadian Seed Growers' Association shipped 2,000 bushels of pedigreed Marquis wheat and 2,000 bushels of pedigreed Banner oats from Moose Jaw to a seed firm in Buenos Aires.

In an editorial commenting on the wheat shipment the Buenos Aires Standard states:

"The next notable visitor to these shores will be Marquis wheat. The announcement comes from Canada, where the distinguished traveller, 2,000 bushels of him, has embarked for Argentina. The question has often been asked: Who won the war that made the world safe for democracy? Some say Joffre, many more say Foch, and not a few say French and the Old Contemptibles. But history will do 'Marquis wheat' justice. 'Pero al grano.' Marquis wheat is not to be found in the peerage. It is, briefly, a special sort of wheat, selected and sorted by an observant Canadian farmer, a Dr. Saunders, in 1909. Little did that gentleman think that, 11 years before the greatest war that ever was seen, he had won it on his homestead in Ottawa. Marquis wheat it was that fed the troops and the country behind them. From a single grain the wheat has grown to be the dominating crop in Canada and the United States. And now it is coming to Argentina. Will the city be decorated in its honor? Will there be a 'Te Deum' in the cathedral or a reception in the Casa Resada? We think not, and yet the guest will probably do more for this country than any other since that stark warrior Juan Garay arrived on the scene."

Buttermilk For Growing Chicks

Buttermilk Extremely Valuable In Feeding Growing Chicks

Chicks receiving buttermilk made considerably larger gains than those receiving no milk in an experiment conducted at the central experimental farm. The chicks used were Barred Rocks and White Leghorns—all hatched on the same date. They were divided into two lots, receiving the same standard rations, one lot being given also buttermilk and water and the other water only. At the end of nine weeks the chicks receiving buttermilk averaged 17.2 ounces in weight, while those receiving only water average 16.1 ounces. The mortality among those which had no buttermilk was more than twice as heavy as among the others.

These measures confirm previous experiments and indicate that buttermilk is extremely valuable in feeding growing chicks, both from the standpoint of development and of viability.

Ancient Burial Mound

More Remnants of Pre-historic Race Are Found in Florida

Remnants of a race believed to have existed in Florida 2,000 years ago, have been dug up in Broward county.

Near a burial mound was discovered an idol, thirty-five feet tall, made of sea mangrove, or "wood eternal," as it is called by those who consider it non-decayable. The features, seemingly those of a female, were carved from shells. They were also of the Mongolia type. The body was fashioned from wood.

Scientists found the burial mound about 500 yards from the Atlantic Ocean. It is one of the highest spots of the country and the site of the first white settlers who came to Florida.

May Have Been Appropriate

Singer Evidently Had Difficulty In Finding Suitable Selection

Dr. J. Ross Stevenson, preaching one Sunday in a western town, was asked by the soprano for his subject, so that she could select an appropriate solo to follow the sermon. When he hesitated she said, "Never mind; I'll listen carefully, and before you get through I'll have something selected." The sermon ended, then came the selection, "Sometime, somewhere, we'll understand!"—Methodist Recorder.

Salesmanship Plus

At the motor show the salesman was endeavoring to interest a girl in a smart little two-seater on the stand. "Has it got every modern improvement?" she inquired.

"Everything, madam," he responded gallantly; "the only thing it lacks is a beautiful owner."

He sold it.—Youth's Companion.

Ant Has Marvellous Brain

Darwin declared that the brain of an ant is one of the most marvelous atoms of matter in the world—perhaps more marvellous than the brain of man. Ants can hear sounds and see light, for which the ears and eyes of man are not fitted, and they have wonderful means of communicating with one another.

What He Got

On the last day of school, prizes were distributed. When one little boy returned home, his mother was entertaining callers.

"Well, my boy," said one of the callers, "did you get a prize?"

"No; but I got horrible mention," replied the boy.

Historic Canada and New England Drawn Together

Chateau de Ramezay, former residence of French Governor-Generals of Canada, now a Museum.

Notre Dame Church, Place d'Armes, Montreal.

If Boston be the cradle of American history, Montreal and Quebec are no less that of Canada's. Strongholds of the ancient French regime, they were the headquarters of the plumed soldiers of France in their battles against the British, and later the descendants of those same warriors took their place side by side with the British in the American Revolutionary war. From time to time, too, American soldiers found their way up into Canada and there was an interchange of hard knocks that was the best basis for the mutual respect and friendship that has grown up between the people of the Eastern States and Eastern Canada. Montreal teems with historical interest, reminiscent of the days of Indian warfare and the gallant struggles of a few settlers. With its wonderful location on the shores of the St. Lawrence, at the base of the beautifully wooded Mount Royal, and its delightful surroundings, the ancient French town offers to the tourist scenery unexcelled in few cities.

The rapid development of travel between these neighboring countries has necessitated greater facilities and the Canadian Pacific Railway and the Boston and Maine have come to an agreement whereby two fast trains will daily ply between Boston and Montreal with connections at the latter point with trains for Quebec. The service went into effect on April 25.

The night train is called "The Red-Wing" after the red-winged blackbird, familiar to both New Englanders and residents of the province of Quebec, as the herald of spring. The name is well chosen because for the first time trains of Tuscan red Canadian Pacific cars will daily flash through the New England States.

The northbound "Red-Wing" will leave Boston at 10.15 (11.15 daylight saving time), and will arrive in Montreal at 8.05 the following morning. The saving of time on this train over the old schedule is two hours and twenty minutes.

On trip from Montreal to Boston there is a saving of one hour, the train leaving at 8.45 p.m., and arriving at 7.10 the next morning. For those who wish to enjoy the beautiful scenery of the New England States there will be the day train, "the Alouette," in English the Lark. This train will leave Boston at 8 a.m., arriving in Montreal at 7 p.m.; on the southbound trip it will leave Montreal at 9 a.m., and reach Boston at 8 p.m. the same day.

WORLD HAPPENINGS BRIEFLY TOLD

A new dish with all the taste and appearances of ice cream but composed principally of rice powder, is the invention of a San Francisco Chinese.

The customary Dominion Day dinner in London this year has been eliminated in favor of a combined reception, dance and concert, to be held in the Canadian Building.

Sir Herbert Ames, Montreal, financial director of the League of Nations, has tendered his resignation, to take effect next July, according to J. Bieler, his assistant.

Dr. A. G. Doughty, Dominion archivist, has been appointed chairman of the public records commission, according to an announcement made in the Canada Gazette.

"About 1,300,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year," according to R. C. Vaughan, vice-president of the Canadian National.

Government terminal elevators in Canada earned a total of $769,640 in the last crop year and spent $340,466, in operating expenses, it was stated in the House of Commons in answer to a question.

New Zealand, always a popular borrower in London, asked for another loan, this time of six million pounds, and the issue was subscribed ten times over within an hour. The loan is at five per cent. and the bonds were offered at the price of 98½.

The "Produced-in-Canada" exhibition, whose primary work is declared to be "to help Canadians that they might help themselves," was officially opened in the Hamilton armories by Hon. Harry Cockshutt, lieutenant-governor of Ontario.

Legislation forbidding the removal of Indian relics from British Columbia and designed to prevent their mutilation by vandals will be introduced at the present session of parliament according to word received from Ottawa by the native sons of British Columbia it is announced.

Modern Highway Across Canada

All-Canadian Road From Halifax To Vancouver Before End of Year

Four different governments have at last heeded the call for an all-Canadian highway stretching from Halifax, N.S., to Vancouver, B.C. Four governments have met on equal ground, and each has pledged the completion of the necessary work. Ontario says: "We are already completing our last remaining link," Alberta is to have its link ready this year. The Dominion Government, speaking for Jasper National Park, states that it will link up with Alberta this year, and British Columbia, the last to fall into line declares, "When the Jasper highway reaches Tete Jaune Cache, British Columbia will have a road ready to carry it on to Vancouver." It will be possible to tour across Canada on a modern highway before the end of the present year.

An Irish Innovation

Free State Government Putting a Premium on Marriage

Most people will approve of the Free State Government's action in offering what amounts to a premium on marriage to certain employees. An examination was held in December to fill a hundred vacancies in the Irish civil service, and men applicants were informed that they would have to accept the same scale of pay as women unless or until they married. The Free State Government's action provides two interesting innovations: official recognition of equal pay for both sexes, and increased remuneration for the married man.—Spectator.

Stone Age Weapons Efficient

Recently Discovered In England Have Edge Keen As Razor

An arsenal was discovered some months ago in the neighborhood of Chatham, England, believed to have been used by cavemen millions of years ago. Two local men made the discovery about sixteen months ago, and since then about four thousand hammer stones, flint axes and scrapers, and other worked flints, have been taken out of the dump. The tools and weapons, although they belong to the earliest period of the Stone Age, are wonderfully efficient. Some of the edges are still almost as keen as razors.

To Develop More Power

Two million dollars will be expended by the Winnipeg Electric Company and its subsidiaries in making the necessary provision to obtain and utilize power from the hydro-electric plant at Great Falls during the next eight months, it is announced. A considerable proportion of this expenditure will be represented by large power machinery, it is stated.

Judges Must Drive

In Silicia, where judges and magistrates are not wealthy enough to own automobiles, special lessons are given to acquaint them with traffic conditions. From their lessons, the judges learned how easily laws are broken.

About the only people who get satisfaction by going to law are the lawyers.

W. N. U. 1632

Islanders Are Energetic

Farmers of Scilly Isles Find Solution Of Market Problem

The flower growers and farmers of the Scilly Isles have shown the way to prosperity to all grumblers at hard times. They have helped themselves.

Shut off from their markets by sundering seas which are often too rough for the ordinary mail and passenger packets, they have set up a ship of their own which can dare the passage to the mainland and will suit their business better than the ordinary coasting service. It does one good in these days to hear of such a spirit.

The trade of the Scilly Isles is in that kind of produce that reaches the florist and the greengrocer. After it is ready the sooner it is in Covent Garden market, London, the better. These energetic islanders, after the war, grappled boldly with the difficulty of transit to the railhead at Penzance by uniting to buy for their own business a fishery cruiser accustomed to keep to the sea in almost any weather. So well has this step succeeded in keeping in steady touch with the market that now a brand new vessel, the Scillonian, belonging to the isles, has begun to make the often stormy run to Penzance.

Amend Railway Act

Federal Aid to Level Crossings to be Increased

A resolution was introduced in the House of Commons by Hon. Charles A. Dunning, minister of railways, preliminary to a bill to amend the Railway Act.

The bill will provide that the total amount of money payable from any annual appropriation shall not, in the case of any one rail level crossing, exceed forty per cent. of the cost of the actual construction work and shall not exceed in any case $25,000.

Mr. Dunning explained that the contributions of the Federal Government toward level crossing construction had been so small that they had not been sufficiently taken advantage of. The bill increases the government's proportion from twenty-five to forty per cent.

The resolution carried, and a bill based upon it received first reading.

Changes Idea About Sleep

Edison Finds Six Hours Is Not Enough Now

Thomas A. Edison, one of the busiest men in the world, who for years boasted that sleep was the least of his worries and that six hours was ample for any man, has changed his mind.

Here to attend the convention of the National Electric Light Association, he was sought for an interview. Mr. Edison was taking a nap.

"I thought you slept only a few hours?" a scribe remarked when the aged inventor came down later.

"I am beginning to find more sleep is necessary," he replied. "I am not young any more. My 'machinery' is out of order nowadays, and I take naps a couple of afternoons each week."

Divorces Make A Record

Total Of 551 Final Decrees Issued In Canada During Last Year

Canada established a record during 1925 in the number of divorces granted in any year since Confederation. A total of 551 final decrees were issued, 134 by the Federal Parliament to Ontario and Quebec residents, and 417 by the courts to citizens of other provinces. In 1924 the total number of divovrces obtained in the Dominion was 543.

A remarkable feature, different from those of other countries, was the preponderance of divorces granted to husbands rather than to wives. Final decrees were obtained last year by 279 husbands, while 272 were given to wives.

Wins High Art Award

Armless Japanese Girl Carried Off Honors In School Exhibition

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokio art circles by carrying off the honors of the Peeresses' school exhibiton. Holding specially constructed brushes between her teeth, Miss Yoneko Yamaguchi, the armless artist, has for several years painted obi, the decorative sash worn by all Japanese women. Some of her work at the exhibit sold for as much as $500.

All men are equal before the law, but not before the mother-in-law.

1326

The Softly Flared Silhouette

The matron has her "innings" in this season's fashions, for all clothes are extremely simple, and many of the most important details happen to be those with a slenderizing effect. This is true of the model pictured here, developed in one of the small all-over floral crepes. The bodice has a centre-front opening with gathers at the shoulders, and is joined to a circular skirt front having an inverted plait. The back is in one piece, flaring at the sides, and has a narrow belt. The sleeves are long and gathered into wrist-bands. No. 1326 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 3⅞ yards 39-inch material. Price 20 cents.

A Health Item Of Interest

A New and Effective Method of Promoting Health

It will be good news to our readers that they now have available a most effective means of promoting health in the home by eliminating the diseases that are transmitted by flies and mosquitoes. Flit, the remarkable insecticide which has been perfected by the Standard Oil Company of N.J. is now obtainable in Canada at almost any drug store, hardware store or grocery store.

For years the research laboratories of the Standard Oil Company of N.J. were engaged in developing a type of insecticide that would be clean, safe and easy to use.

At last their expert entomologists and chemists succeeded in perfecting a thoroughly scientific product superior to the old methods of killing insects, in that it kills all of them that come anywhere in the neighborhood of the application of the spray, and that is very quick and sure in its action.

Having found this wonderful answer to the insecticide problem, they called it "Flit," and under this name it has attained a huge sale in the United States, and is in fact widely recognized as an aid to home health, by reason of those qualities which make it sure death, not only to flies and mosquitoes, but also to moths, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Sprayed into cracks and crevices where insects hide and breed, Flit destroys both the insects and their eggs. An added advantage is that Flit will not stain the most delicate fabrics. This has been proved by extensive tests.

World's Poultry Congress

The Belgian minister of agriculture has named official representatives to the World's Poultry Congress at Ottawa, July 27 to August 4, 1927. They are M. Maenhout, member of the House of Representatives, and president of the National Federation of Poultry Societies of Belgium, Lemberge; M. Pulinckx-Eeman V., editor in chief of the journal Chasse et Ueche; and M. Heyndrickx, Ach., 4 Chaussee de Bruxelles, Ledeberg.

German Professors Claim New Invention

Apply For Patent For New Silk-Like Substance

Two professors of the Kaiser Wilhelm Institute at Dahlem, a suburb of Berlin, have applied for a patent for an invention which they believe is destined to play an important part in the textile industry. They claim to have invented a method of using the heads and wings of various insects, such as cockchafers, wasps, locusts and beetles, as well as the shells of crabs and other crustacea, for the production of a new substance containing chitin.

This material, on the addition of certain chemicals, can be spun into a fine thread by a process similar to that employed in the manufacture of artificial silk. This new thread is said not only to have a sheen and fineness equal to that of silk, but also to be exceedingly pliable and far stronger than silk.

This discovery would be of little value if the manufacturers of the new material had to depend on the somewhat limited supply of the insects in question. The two professors state, however, that they have already discovered a substitute for the beetles' wings in the form of a material which is obtainable in inexhaustible quantities in nature, and at a low price.

They decline to reveal the nature of this substance until the patent rights have been fully secured. The Kaiser Wilhelm Institute, already famous for its numerous inventions in the realm of poison gas, hopes, by this discovery in the field of textile research, to win new laurels in more peaceful spheres of industry.

As It Is In Russia

Heavy Death Rate Reported Amongst Soviet Spies

The third internationale of village correspondents and factory correspondents, meeting in Moscow report a heavy death rate in their ranks during the last year. The 500 delegates attending report they are living daily in fear of assassination.

Most of the speakers exhibited wounds, relating how the peasants, enraged at their news reports, attacked them, burned their houses and attempted to murder them. Reporters covering the conference say the delegates evidenced little enthusiasm in their work and with sombre faces discussed 2,000 assassinations in their ranks during the last year.

According to Commissar Bukarin, the Soviet Government has 250,000 of these correspondents on the payroll who during April turned in 1,496 "stories," which resulted in 606 jail convictions for peasant tax dodgers, loss of posts by 102 officers of village co-operatives, 400 additional sentences to concentration camps for peasants participating in attacks, and 80 executions.

Would Make English Phonetic Language

Modified Spelling of Thirty Thousand Words is Advocated

Progress in the simplification of spelling was reviewed at a meeting of the simplified spelling board at the Men's Faculty Club of Columbus University.

The board advocates the modified spelling of 30,000 English words and declares that English would be a phonetic language, as far as its limits allowed, if that were done. The words, "tho, thoro, thru, program, catalog and pedagog," have been embodied in a list accepted by nearly 600 newspapers and periodicals. With their compounds and derivatives, the six words establish the principle for the simplified spelling of twenty-four words.

Plans Aerial Expedition

Engineer Antonio Pauly, of Buenos Aires, has presented to the ministry of the navy plans for an Argentine aerial expedition, to the South Pole and an extensive scientific exploration of the Antarctic continent.

Capt. Geo. L. Johnson, of the Soldier's Home, Maymyo, Burma, expects to visit Canada this summer. Burma will participate in the World's Poultry Congress, and will provide an exhibit of the original Jungle fowl, from which our domestic poultry originated.

A mileage book is so interesting that a traveller is always sorry when he reaches the last page.

A coward is a man who knows he is wrong and refuses to admit it.

ON THE AIR

What Is Doing In the World of Radio

There has been quite a boom in wireless sets in Paris since the general strike in England, especially among English-speaking residents who used them to get their strike news.

Many persons are suffering from radio deafness because they listen for many hours without removing the ear phones. An ear specialist advises the use of loud speakers.

Con.—The radio will never take the place of newspapers.

Denser.—Why?

Con.—You can't start a fire or line a carpet with a radio set.

Many broadcasting stations are now making public their advertising rates. One United States broadcast station has a rate ranging from $30 for a quarter of an hour during the day to $120 for one hour at night.

Taulliegne, the famous priest and scientific electrical engineer, who is noted in France for his inventions as well as his sermons, has just completed what he claims is the first really perfected loud speaker for crystal sets.

Air conditions for radio are best in February, the next best months being March, January and November.

Commercial wireless service inaugurated at Rio Janiero, Brazil, is in touch with London, New York, Paris, Berlin and Rome.

Sonia Radina, radio artiste, has insured musical manuscripts for $100,000. She spent four years living with the peasants of Europe, listening to their folksongs and copying them by candle light. She uses these manuscripts for her radio concerts.

Electric power men from all parts of Wisconsin have pledged themselves not only to eliminate power line interference of radio reception, but to assist the radio set owners in finding the source of much of the other outside troubles such as violet ray machines, X-rays and such.

When a radio receiving license is granted to a listener in Japan, his set is tuned to the wave length of the Toyko Municipal Broadcast Station and then sealed so that no other station may be tuned in. It is reported that this is done in order that no radical ideas can be picked up if put on the air by secret broadcast stations.

Many people have the mistaken notion that the resistance of headphones is a measure of their quality. Actually, radio headphones of 2,500 ohms resistance may be much better than others of 5,000 ohms resistance. The resistance is determined by the length, size and kind of wire used in their construction. Their performance is a matter of proper engineering design and the use of good materials.

Carrying Heavy Load

British Pensions Bill Rolls Up Year By Year

For the current fiscal year, ending March 31, 1926, the British Government is obligated to pay pensions in the aggregate sum of £127,459,000. Of these amounts the largest are for war pensions, including merchant seamen's pensions and administration, amounting to £63,957,000, according to the Bankers' Trust Company of New York, and pensions charged to defence votes amount to £16,388,000, or altogether £80,347,000 for what may be designated as pensions for military purposes. Old age pensions and widows' and orphans' payments call for £33,795,000. £4,888,000 is payable to school teachers, £2,984,000 to the police and £5,447,000 to civil servants.

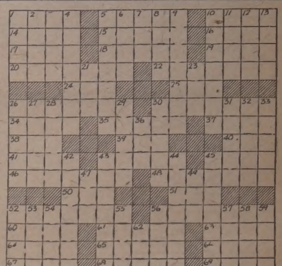

These payments will exceed those for the previous year by £5,568,000, and compare with a total of £20,631,000 in the year which ended March 31, 1915.

Using More Gas

22 Per Cent. Increase In Use Of Gasoline Seen In 1926

Gasoline consumption so far this year has greatly exceeded the industry's expectations, according to oil leaders in the east. Early in the year one of the most prominent experts in this line estimated the gasoline demand in 1926 would be approximately 15 per cent. greater than the total demand for 1925. The actual demand in the first three months of the year showed an increase of 22 per cent. This background of exceptionally good demand for gasoline forms one of the real basis of the present heavy demand for the leading oil stocks, and has furnished the real backbone of the industrial group recently.

OUR CROSSWORD PUZZLE

Horizontal

1—Stop.
5—Become excited, puff up.
10—Astral body.
14—Old world plant of lily family.
15—A tooth.
16—Tune of air.
17—480 sheets of papers.
18—Variegated waxy quartz.
19—Repair.
20—Game played in bowling alleys.
22—Cast into the shade
24—Period of time.
25—Brownish color.
26—Brackets or angle irons.
30—Long gaiters.
34—Single thing.
35—Having ears.
37—Tax or tribute (Dial.).
38—Consumed.
39—Breach.
40—Hasten.
41—Be split or rent.
43—Mended.
45—Froth.
46—Makes deeper.
48—Recompenses.
50—Part of to be.
51—A bag-like part.
52—Guarantees.
56—Bandaged.
60—True.
61—Revolving piece.
63—Small valley.
64—Girl's nickname.
65—Having a jagged edge.
66—Otherwise.
67—Let it stand (printing).
68—Defied.
69—Crease or crack open

Vertical

1—Male of the red deer
2—To the lee side.
3—Borrow.
4—Storm.
5—Issue from.
6—Huge pieces of timber.
7—The armpit.
8—Wisp or tuft of hair (Scot.).
9—Built.
10—Money saved.
11—Snare.
12—Objectives.
13—Plant allied to the turnip.
21—Anger.
23—Loiter.
26—Protect, watch over.
27—Loosen.
28—Sifting apparatus.
29—Wise men.
30—One affected with dread disease.
31—Ethereal fluid in veins of gods.
32—A water nymph.
33—Checks.
36—Crude.
42—Shoulder ornament of officers.
43—Scoffed at.
44—Wanted.
45—Fronts of buildings.
47—Mistake.
49—Droll fellow.
52—Wearies.
53—Tidy.
54—Satisfy.
55—North American rail.
56—Fail to keep or maintain.
57—Story.
58—Girl's name.
59—Consider.
62—Jagged promontory.

SUNDAY SCHOOL LESSON

JUNE 13

JOSEPH'S FIDELITY

Golden Text: Seest thou a man diligent in his business? he shall stand before kings. Proverbs 22.29.

Lesson: Genesis 39.1-23.

Devotional Reading: Proverbs 4.10-18.

Explanations and Comments

Joseph Becomes House-Steward in Egypt, verses 1-6.—A band of Ishmaelites brought Joseph down into Egypt (see The Historical Background) and there sold him to Potiphar, Pharaoh's captain of guard. Owing to his personal charm (for he was comely and well-favored, verse 6), Joseph was taken into his master's house as a servant instead of being sent into the fields to labor. What a contrast from his life at home as the favorite son of his father and his free life in the open as a shepherd must have been his life in that Egyptian household! But Joseph was adaptable. In a short time his ability and trustworthiness—a token of God's presence with him—led Potiphar to make him the superintendent of his household, or house-steward. Potiphar's confidence in Joseph was so complete that he put everything into Joseph's hands, save his own food. The exception was probably due to the strict laws of caste in Egypt: see Gen. 43.34; 56.34.

"Character plus capacity plus charm always makes its way."

"The Lord made all that he did to prosper. There is no hint of miracle here. Providence works from within outward, as well as from without inward. God honors trustfulness. If you are sure that you are in the hands of the God above, and under his guidance, you have a quicker eye and a steadier hand for the affairs of this life. Prosperity inevitably follows" (R. C. Gillie).

Tribute To Mark Twain

Statue of Tom Sawyer and Huckleberry Finn Is Unveiled

A tribute to the eternal boy, a life-size bronze statue of Mark Twain's immortal Tom Sawyer and Huckleberry Finn, was unveiled at Hannibal, Mo., at what the chamber of commerce called a homecoming for the great humorist and river pilot.

The statue was a gift to the city from George A. Mann, of Hannibal, president of the State Historical Society of Missouri and a great admirer of the famous writer.

Prisoners Returned After Holiday

A check-up shows that all the prisoners of the jail at Tucuman, given their freedom for a day on the occasion of the anniversary of Argentina's independence day, returned to the jail.

Piracy Is Still Practiced

But Is Most Common In Oriental Waters

That pirates still exist is evident by the action taken in Switzerland at one of the League of Nations meetings. It provided for an agreement that warships of any nation may chase pirates into the territorial waters of any other nation. The pirates then will be tried in the country in which they are captured. This action came about in codifying international law and the suggestion on piracy came from a Japanese minister. It is apparent piracy is more common in Oriental waters.

Invention Will Assist Miners

Calculated to Lighten Work and Speed Up Production

An instrument which is regarded as of great assistance to miners, has been invented by T. S. Hallet, of Edmonton.

The invention, which is known as the "auger bit head," is calculated to lighten the work of the miner and speed up production. Mr. Hallet, who is a man in his early thirties, has followed the occupation of a miner and engineer for a living. Previously he perfected a resilient vehicle wheel which is now widely used in mines.

Develop Helium Gas

Commercial development of helium gas in Ontario on a large scale is expected to result from experimental work that the provincial department of mines, in co-operation with the University of Toronto, is to carry on this summer at the government's land at Englewood, where helium gas deposits were found during the war, but kept secret until a few months ago.

Clever Woman Astronomer

Was Assistant to Astronomer Royal Century and Half Ago

How many people, who think that a scientific woman is a twentieth century product, know that Caroline Herschell was, a century and a half ago, assistant astronomer royal.

Her brother was the famous astronomer, but her mother in Hanover would let her have no accomplishment outside household duties, except knitting. Her father, however, gave her violin lessons on the sly.

Then her brother offered her a home in England, and she came over and became a successful singer. Taking up astronomy, she became her brother's assistant, and herself was responsible for the discovery of eight comets. Undoubtedly a very clever woman, she rejected all praise, thinking it might detract from her brother's reputation.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by **H. L. GATES**

Published by arrangement with First National Pictures, Inc.

THE STORY THUS FAR

Joanna, pretty, ultra-modern shop girl, is informed by her employer, Graydon, that an unknown man has given her a million dollars to spend as she wishes. There are no strings to the gift—no conditions to meet—she is not even to know the name of her benefactor. She endeavors in vain to learn more from banker Eggleston, where she meets his nephew, Brandon, a man-about-town, who helps her write her first check and tells Joanna that he intends to make love to her. Dazed with the amount of money, hurt by the fact that her shop girl companions and the merchants with whom she deals, spending her new found fortune, believe her to have gone the limit in securing the money, she returns home that night expecting to meet John, her hopelessly "old-fashioned" girlhood sweetheart.

CHAPTER VI.—Continued.

"Miss Twenty-seven" had become the slender wraith of a hothouse flower, all perfume, softness and delicate color; beneath her mink wrap she shone vaguely grey; smart grey tailleur that fell straight from underneath her shoulders, but hugged her hips; skirt that dropped into straight lines without a touch of trimming or vagrant pleats or colors; a thing that was infinitely and expensively "avenue"; grey sheer hose of a quality that echoed into the very souls of Georgie and the rest! Slippers, slippers that were wondrous things of some skin with the sheen of grey velvet! A ravishing little hat, grey with a splash of scarlet at the side. Georgie estimated the very simplicities of that hat as next door to being priceless.

A single flower, but that an orchid, nestled at Joanna's waist.

There was an immediate babel of voices, punctuated presently by the sharp reminder of an impatient customer that there were those with wants to be attended to.

"So you weren't fired after all?" Georgie exclaimed when she had summoned her wits. "Here we've been picking out the hymns for your funeral all day and you—you've pulled off whatever you've pulled off! Let the tidings loose, Jo! What's what—and who?" Georgie's tone had dropped to the confidential level.

Joanna's eyes narrowed immediately. There were times when Joanna could remind one of a lynx. This was one of them.

"Drop the 'who' thing, Georgie!" she warned.

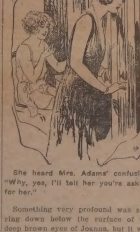

Georgie stared at her. "Well, for the love of—" The girl on the other side of the counter, on the outside now, interrupted sharply:

"Yes, that's what I said. You're plugging in the wrong line!"

She had intended to let "Mr. Good Morning" feast his eyes also, but suddenly she lost the flavor of her play. She swung smartly about and without as much as a nod, leaving an endless volley of questions completely unanswered, she elbowed her way into the street.

She had thought of going up to let Mr. Graydon see her and to ask of him some more wild questions, but she forgot.

Why did everyone, even Georgie, who out of some very definite understandings between them, should know her pretty well—why did all of them think things? What was wrong with the world, the whole world? Was there no one who really knew about a girl? Not even among other girls?

She heard Mrs. Adams' confusion. "Why, yes, I'll tell her you're asking for her."

Something very profound was stirring down below the surface of the deep brown eyes of Joanna, but it was still too abstract a confusion for her to grapple with. She was singing again when she reached home. The world for some unfathomable reason had picked her out to be good to.

When Georgie arrived, breathless from her rush from the store, Joanna was in the midst of her feverish unpacking of boxes. She had forgotten her pique, and Georgie had forgotten her offense apparently. She plunged in to help, vainly trying to get in questions between her squeals of delight over the procession of surprising new things. Whatever pertinent queries she had treasured up against opportunity to voice them were effectually silenced when Joanna remarked:

"Lay off tomorrow, Georgie. Get sick or have a boil or something. I'm going to take you to some place I found today and buy you some real things—whatever you want. But you've got to wear your dresses looser, little daughter! That black satin you affect is all right, I guess, but when you get the real things that have some honest-to-goodness style in them, why you don't need to wear them so skimpy to look your best. If you don't know what I mean stay awake tonight and think it over, Georgie. I'm giving you something straight!"

"So straight it sounds like a sermon to me!" the other girl retorted. "And this isn't Sunday, either! But you've got a license all right, I suppose." It was a sententious finish, but Joanna preferred not to take it up.

Joanna heard Mrs. Adams through half open doors tell other girls in the house that the drawing room has been assigned for the evening and heard the flippant rejoinders that there were lots of other wide open spaces in the world anyway. After a while, after she had resigned outright one of her new gowns to Georgie as an installment of tomorrow's promise, she thought she heard John come in the front door. She listened eagerly, lips hot, eyes shining and body trembling, but there was no call from Mrs. Adams. She fell again to examining herself in her bit of mirror, twisting and squirming to glimpse as much at one time as possible of her gorgeously soft and glimmering evening gown, out of which her throat lifted round and white. She'd always had a frock without sleeves and a fairly low cut neck, but each of them, modest affairs, had made her hungry for something real—something that really would be a gown. At last! What the feel of that dress was to Joanna nobody but Joanna will ever know. She wouldn't admit it herself, and it's the sort of thing that can be painted on a canvas or put into music, but never said in words.

She heard the rattle of the doorbell. She signed to Georgie to be quiet and opened her door an inch or two. She heard Mrs. Adams answering an inquiry, and the voice she heard then was not John's, but the quiet, modulated tones of the man she had met at the bank—Brandon.

She heard Mrs. Adams' confusion. "Why, yes, I'll tell her you're asking for her," the puzzled landlady was saying. "But I don't know whether to put you in the parlor to wait or not. There's someone—her friend—is in there. I've just been talking to him about her. She doesn't know he's here yet."

And then Brandon's suave voice:

"I am sure we will get on famously, her—her friend and I. We'll talk about her, too, you see, if she is very long coming down. I have brought her some flowers. Will you be good enough to hand them to her?"

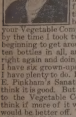

Joanna heard Mrs. Adams herding him into the "drawing room only" and in her diffident, blundering way mumbling an introduction. So John had come in. She was right when she thought she heard him. And he and Mrs. Adams had been talking together all this time in muffled whispers so she would not know—talking of her. And now Brandon, a man who she thought knew what was a secret from her, had come, as he had lightly threatened, and John would see him. Brandon and John! She wanted to keep John. She'd never realized before how much.

She didn't know why, but Joanna was afraid as she went downstairs; so soft and young and beautiful in her costly new gown, and so flushed from the day's events, but afraid.

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it now. I had a female trouble so badly I could hardly walk and I was all run-down and could hardly get around to do my housework. I would be in bed three or four days at a time. I was told by a friend to try your Vegetable Compound. I did, and by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sanative Wash, and I think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost much more."—Mrs. NELLIE HORN, 28 St. Matthews Avenue, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently, will relieve this condition. C

Asparagus Used Centuries Ago

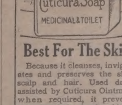

Culture of Plant Introduced Into England During Reign of William III.

Before the days of Henry VIII., vegetable gardens were not made in England. Asparagus, with its remarkable properties, was used as a food 200 B.C., and though our Tudor ancestors ate the whole of the stalks with spoons, the culture of this plant was not introduced until the reign of William III., when Sir William Temple brought it from the Hague. The King, visiting Sir William at Moor Park, showed Jonathan Swift, the secretary, how to eat it in Dutch style. "King William always ate the stalks whole," said swift.

Cuticura SOAP

Best For The Skin

Because it cleanses, invigorates and preserves the skin, scalp and hair. Used daily, assisted by Cuticura Ointment when required, it prevents pore-clogging, pimples, blackheads, and other annoying irritations.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd. Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

People Living Longer And Becoming Healthier

Proved By Statistics Given Out By Insurance Actuary

An insurance actuary has just given out the statistics of old age, and the old folk may congratulate themselves that they are becoming not only a multitude, but a very hearty and healthy lot, with conditions and prospects that are every day and in every way getting better and better. Old people, says the actuary, now constitute 4.9 per cent. of the population, whereas thirty years ago they were only 3.9 per cent. There are four old people today where there were three a third of a century ago.

But what is old age? The insurance actuary makes all the usual courtesy dodges so as to let everybody feel old if he wants to or stay young as he likes; but in order to stick a pin somewhere he says 65 is old, 65 and thereafter. And the sixty-fivers and over—well, there are 500,000 in New York State and 200,000 in New York City, and while the figures are not given for the other states, the estimate is around 7,000,000 for the whole country.

About two-thirds of all the old people are said to be self-supporting and only one-sixth dependent upon private or public charity. Another sixth is supported by children, relatives or friends. Only 2 per cent. are said to be in almshouses. The increasing number of the aged, not merely the youth of 65, but those of 80, 90 and 100, who are said to be a vast army all by themselves, simply proves that all of us are living longer than our fathers did.—Philadelphia Public Ledger.

Jade Is Sacred Jewel

Pastmasters At Grading, Grinding and Carving Are Chinese

Jade, which has always stood very high as a sacred jewel, being called "The Divine Stone," and worn by Indians as an amulet against bites of snakes and other venomous creatures, is at present the fashionable stone, and the price has gone up in sympathy with the demand for this polished green quartz. What is erroneously called Chinese jade is the dearest and the most sought after. Yet in the strict sense there is no Chinese jade, although the lapidaries, pastmasters at judging, grinding, grading, and carving, are Chinese. The raw material comes by the Oriental caravan routes from Turkestan and Burma, finding its way into China. The Chinese regard jade as the finest of jewels.

A Pessimistic Picture

Fears Women In United States Will Soon Be Ugly

Intelligence and beauty go together, and because the most intelligent section of the population is having small families, the American woman is becoming ugly, states Albert Edward Wiggan, scientific writer. The most intelligent 25 per cent. of the population are having only one or two children to a family, while the least intelligent, and ugliest, 25 per cent. are producing three or four.

"If this process goes on, beautiful women will soon be remembered only in pictures," he said. "And when beauty declines, intelligence, morals, health, sanity and longevity all go with it, because all are linked with beauty."

Minard's Liniment for backache

Laboring Under A Mistake

Colored Pastor Had To Do His Own Collecting

"Breddern, sistern," said the pastor, sadly, surveying his dark flock with a face full of woe, "when I done took this cong'gation I was promised a salary. This salary was to be paid in chickens. I have been expoundin' de scripture for twò months, and now I wishes to ax—whar is dem chickens?"

There was a long silence.

Then a gaunt deacon arose and said: "Rev-rend Jones, we is mos' heartily sorry dat yo' has been de victim of a mistakenship. Yo' has misunderstood de method ob which our pastors is paid. We provide yo' wid de lantern and two gunnysacks and den yo' collecks dat salary yo'self."

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Microscopes Used In Detection Of Crime

Reveals Many Things Naked Eye Would Never See

While Sherlock Holmes has been depicted as an inveterate user of the microscope—or common magnifying glass—his work of the kind was as nothing to that now being done in New York in the use of magnifying instruments in the detection of crime. Particles of dust and lint almost too fine to be noticed with the naked eye have been linked with scenes of crime, after being taken from the persons of suspects.

A man is prouder of things he thinks he can accomplish than of those he really can.

It takes forty years to make a military machine; four years to break it; a million years to learn better.

You can measure civilization's progress by the statues it erects to those it once called cranks.

A Modern Jean Valjean

French Convict Had Same Experience As Victor Hugo's Hero

The minister of justice has commuted the sentence on an escaped convict named Honore Chantecaille in remarkable circumstances.

In 1886, Chantecaille, then 21 years of age, was sentenced to five years' penal servitude for robbery, the term of servitude to be followed by permanent residence in French Guiana. After four unsuccessful attempts he succeeded in escaping, made his way to France and obtained work in Angouleme as a baker. He married and for thirty years has lived honorably in the town with his family. In September, 1924, while suffering from a recurrence of malaria, he gave himself up to the authorities and disclosed his identity. Since then he has been kept in prison. Strong representations were made on his behalf by the mayor and population of Angouleme. Chantecaille's sentence has now been commuted into one of twenty years' police supervision which carries with it a prohibition to reside in any place without police authority. Residence in Angouleme is not forbidden, and the man is therefore able to rejoin his family.—Paris Correspondent London Times.

Delicious Dessert

Caramel Pudding, a Dessert That Makes Itself

One of the most delicious desserts one can serve, and it is one especially loved by children, can be said practically to make itself. It is called Caramel Pudding. Here it is:

"Place an unopened can of Borden's Eagle Brand Condensed Milk in a kettle of boiling water and simmer for two and a half hours, being careful not to let the kettle boil dry. Remove can, cool and chill. Remove top of can, cutting along the side of can—not the top—so that the contents may be removed whole; place on a serving dish and garnish with broken nut meats and whipped cream. To serve individually, cut in slices, garnish with nut meats and whipped cream—or use plain unsweetened cream, with or without garnish."

Little Helps For This Week

Not slothful in business, fervent in spirit, serving the Lord.—Rom. xii., 11.

Since Thou hast added now, O God!
  Unto my life another day,
And giv'st me leave to walk abroad
  And labor in my lawful way,
My walks and works with me begin:
Conduct me forth and bring me in.
—George Wither.

Remember that if the opportunities for great deeds should never come, the opportunity for good deeds is renewed for you day by day. The thing for us to long for is the goodness, not for glory.—Frederic W. Farrar.

Likely In Canada Too

Large Percentage of Earnings Spent On Motor Cars

It is only 25 years since the automobile emerged as a commercial product, and today the manufacture of motor vehicles takes first place among American industries. The bureau of industrial technology estimates our annual automobile bill at $14,000,000,000. This makes an interesting comparison with the total business of our retail stores, which has been estimated at $35,000,000,000. Computations of this sort are obviously subject to a wide margin of error, but it seems safe to conclude that, roughly, for every dollar spent for food, clothing and house furnishings, we spend 40 cents on motor cars and their upkeep.—New York World.

A man is never contented with his lot until he occupies one in the cemetery.

Flesh Wounds.

Signed Without Reading

Experiment Tried In Pennsylvania Could Be Duplicated Any Place

Eighty-seven residents of Braddock, Rankin, Swissvale and eight other boroughs in Pennsylvania are quite willing to have their homes and places of business burned down or otherwise destroyed—proving all over that Barnum was right.

To win a box of cigars and as a sarcastic gesture aimed at the originators of foolish petitions, a Swissvale man passed round a petition plainly requesting the governor to cause immediate and entire removal of . . . buildings, homes, dwellings, shops or works . . . by combustion or manual razing in Braddock, Wilkinsburg, North Braddock, Rankin, Swissville, Turtle Creek, East Pittsburgh, Homestead, Munhall, Irwin and Wilmerderg.

In less than an hour 87 citizens, home owners and business men of the boroughs, had signed the petition without bothering to read it. The author, upon asking for their signature, explained that it had been circulated by the women's club for the purpose of "cleaning up" the community. Only one person out of 88 read the petition, and he refused, of course, to sign it.—Winnipeg Tribune.

Golf Course Captivates Byng

Jasper Park Golf Course May Soon Rival Best in the World

Baron Byng of Vimy, who as commander of the Canadian Corps and the Third Army, was known as the man who has never been beaten, has been conquered at last. He was captivated a few days ago by the beauty of the Jasper Park Lodge golf course, to which he went to play nine holes and remained to play 27. All his private engagements for the day at Jasper were placed aside following the morning round so that he might cover the full course during the afternoon. When he left for the special Canadian National train which carried him east on his last official trip through Canada, he cast a last longing look towards the beautiful home green and remarked that it has been one of the most enjoyable days of his life and the course one of the finest he had ever seen. He even ventured the prediction that within a yar or two the course would rival the best in the world.

Could Not Remember Wife's Christian Name

Elderly Farmer Had Never Used It In Addressing Her

In certains parts of rural England it is uncommon for a man to address his wife by her baptismal name, an illustration of which Thomas Hardy, the novelist, recently told the following story: An elderly farmer called in a lawyer and explained that he wished to make his will. The lawyer took out his fountain pen, and prepared to receive his client's instructions. "I'll leave all my brass to my wife," the farmer said. "We've been married thirty years." "What's your wife's Christian name?" asked the lawyer, making a note of the bequest. The farmer scratched his head, thought hard for several seconds, and finally said that he couldn't remember. The lawyer thought of a plan that would spur his memory. "Walk to the door," he suggested, "and shout upstairs as if you were calling her." The farmer did, and shouted, "Missus."

Women Learn Engine Driving

A school has been opened at Belgrade to teach women to drive steam locomotives. Women pupils do not discard the skirt, which in fact they wear rather long, but practical work probably will make graduates adopt trousers and overalls, as so many women did in France when forced by the war to take up men's professions.

Says Mars Is Cold Country

The average temperature on Mars has been estimated as being about 100 degrees below zero according to the United States bureau of mines. The department made the temperature computations by a delicate set of instruments invented by one of the scientists in the bureau.

The Oil for the Athlete.—In rubbing down, the athlete will find Dr. Thomas' Eclectric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Gospel Not World Wide

Although the Gospel has been carried into most corners of the world in execution of the Biblical mandate, vast fields yet await the missionary. China has 300,000,000 adherents of "heathen" religions (or philosophies); Japan, 72,000,000 out of a population of 77,000,000, and India's non-Christians number 217,000,000.

World's Largest Theatre

A group of Italian capitalists is arranging to construct at Genoa what is claimed will be the largest theatre in the world. The site chosen is the Place Tagliata, and will face the sea. This new playhouse at Genoa is to cost $8,000,000, or 40,000,000 lira in native coin.

Produces Cold Light

A demonstration of a method of producing cold light was given recently by a scientist at Manchester, Eng. By the process the electricity is changed to light without the luminary substance being heated in any way.

Use Found For Locusts

Oil Makes Lubricant For Watches and Delicate Machinery

A use has been found for the locusts which destroy vegetation in South Africa and other countries. The insects are captured in quantities and fed into presses which crush them and squeeze out an oil that is used as a lubricant for watches and other delicate machinery. The remaining solid matter is pressed into cakes and turned to use as poultry feed.

THE ONLY MEDICINE BABY HAS HAD

Is What Thousands of Mothers Say of Baby's Own Tablets

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Experience teaches her that they are without an equal for relieving baby of any of the many minor ailments which afflict him at one time or another. The Tablets never fail to be of benefit—they cannot possibly do harm as they are guaranteed to be free from all injurious drugs.

Concerning Baby's Own Tablets Mrs. Russell Hill, Norwood, Ont., says:—"I shall always have a good word to say for Baby's Own Tablets. I have given them to our baby girl. In fact they are the only medicine she has ever had and I am proud to say that she took second prize at our baby show. She is eleven months old and weighs 22 pounds. No mother whose child is peevish or ailing will make a mistake in giving it Baby's Own Tablets."

Baby's Own Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Riches and Luck

The fact that impresses me most powerfully is the great number of poor people who become rich, and the great number of rich people who become poor.

And it is never good or bad luck; it is good or bad conduct.—E. W. Howe's Monthly.

During the last decade the per capita consumption of meat in Europe has increased 50 per cent.

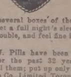

It takes us a lifetime to learn that we are not our own best friend and worst enemy.

She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McClintock, Charlottetown, P.E.I., writes:—"About a year ago I was greatly troubled with my heart.

I could not sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the lights before I could get to sleep.

After having read of your

I took several boxes of them, and can now get a full night's sleep without any trouble, and feel fine in every way."

Reasons Why the U.F.A. Government Should be Returned

The main concern of the Province is that of administration. Public Health, Maintenance of Law and Order, Transportation, Education, Industrial and Agricultural Welfare, are among the principal functions of the Government of Alberta.

Administration and legislation can be best handled by a non-party government

The U.F.A. system of government is one of co-operation with other representatives in the interests of the Province. The party system is one of opposition.

The party system is organized from the top down, the U.F.A. system is organised from the bottom up. Under the U.F.A. system the power is with the people. It is not contended that the new system is perfect, but it is a big step in advance.

The political parties in Alberta are subject to dictation from their respective headquarters in Ottawa. The U F A. representatives are responsible only to the people of Alberta. Recent events have proved the necessity of having a Government in Alberta not subject to outside dictation.

All over the world the party system is breaking down.

The Alberta Government is not a class Government. It has always been prepared to co-operate with representatives of all interests elected to the Legislature.

Your only choice in this election is between the U.F.A system of Democratic Government and the party system. There is no alternative.

"In the wake of the party system had followed corruption."—J. T. Shaw, November, 1921.

WORK AND VOTE FOR U.F.A. CANDIDATES.--JOIN THE U.F.A.

This space is paid for by the membership of the U.F.A., for the information of the electors,

Issued by the U.F.A. Publicity Committee, Calgary.

HAND HILLS ECHOES

Mr and Mrs F C Courtney have Mrs Courtney's sister visiting them from Macleod.

Mrs S A Peterson has arrived back home after spending the past six months with her daughter, Grace, down in the States.

Johnny Yorke had to go back to the Drumheller Hospital to have his arm re-set.

A large crowd attended the "Jiggs and Maggie"—corn beef and cabbage—supper at the Cotter School Friday night. The supper, which was good and lots of it, was followed by a dance.

Mr and Mrs R B Allan and Mrs L McDonald motored to Drumheller the last part of the week.

Those attending the U.F.A. Constituency convention at Hanna on Saturday from the Hand Hills and south were Mr and Mrs F L McFadden, Mr and Mrs P Robinson, Mr and Mrs James Mudd, Mr Hart, Mr P Campbell, and George Proudfoot.

Whilst kicking a football around near the Hand Hills Lake Club, Jack Morris had the misfortune to break his leg. He was removed to the Hanna Hospital.

We are pleased to report that little Hazel Joberg is now back home from the Hanna Hospital.

E L Venus, S Peterson and Fred McFadden attended the council meeting held at Mecheche on Tuesday.

Church services will be held by the Rev. Mr Geeson at Blair School Sunday, June 13.

CRAIGMYLE NEWS.

Tuesday's wind and dust storm from the south-east was about as bad as we have had this year and there have been some fairly bad ones.

Messrs Ross and Rubin, who have been carrying on a general store business here for the past five years, have dissolved partnership, and Mr. Rubin will carry on the business alone in future. Mr. Ross expects to be leaving in a few days but has not definitely decided where he will locate.

C. L. Sitlington, Conservative candidate for Hand Hills, assisted by E A. Dunbar, K C, of Calgary, held a meeting in the Farmers' hall on June 3rd. Mr. Sitlington gave a thorough outline of the financial affairs of the province and showed that he had a firm grasp of the details of the situation Mr. Dunbar dealt with the needs of the province in the way of capital and immigration.

Clem Sieverding has his outfit on the road east of town completing the road to the correction line which was started but not finished last fall.

Mrs. P. S. Clarke, of Granum, spent a few days in town last week visiting her daughters, Mrs. F. F. Paterson and Mrs P. H. Gayner.

Mrs. F. F. Paterson went to Calgary at the beginning of last week to attend the Grand Lodge of the Order of the Eastern Star.

W. E. Thompson expects to sail for Ireland from New York on Saturday, June 19.

Mrs. C. L. Sitlington is spending a few days in Calgary.

L. S. Goss, a former resident of the Heart Lake district and now of Augusta, Montana, arrived here last Friday, and expects to be here until the first of next week. He came by car, a distance of approximately 600 miles in two days, which is fairly good travelling.

Capt. N. J. McCrimmon has been appointed as returning officer for the Hand Hills constituency at the ensuing Provincial election.

Cards of Thanks.

We wish to thank the many kind friends who helped us by their kindness and sympathy in our sad bereavement, also the Delia Ladies' Aid, the Women's Institute and the Trail Rangers for the beautiful plants given to Emerson in his illness, and to Mr. and Mrs. Roy Speelman for the lovely flowers sent.

Mr. and Mrs. J. E. Hunley and Family.

Mr. and Mrs. John Wilson wish to thank the Delia Ladies' Aid and Women's institute for the beautiful plant sent to Mrs. Wilson during her recent illness.

The Krug farm, south of Grassy Lake in Southern Alberta, comprising four sections of land, has been sold to a colony of Mennonites for a sum stated to be $115,000.

Construction of the big Spiller's mill at Calgary is to be completed this year, and the mill is expected to be ready for operation in October.
